HONG KONG SPECIAL ADMINISTRATIVE REGION

May 2024

CONTENTS

Paragraphs

CHAPTER 1 : OVERVIEW OF ECONOMIC PERFORMANCE

Overall situation	1.1 - 1.2
The external sector	1.3 - 1.4
The domestic sector	1.5 - 1.6
The labour sector	1.7
The asset markets	1.8 - 1.9
Inflation	1.10 - 1.11
GDP by major economic sector	1.12
Other economic developments	1.13 - 1.14
Box 1.1 Business sentiment in Hong Kong	

CHAPTER 2 : THE EXTERNAL SECTOR

Merchandise trade	
External environment	2.1 - 2.4
Merchandise exports	2.5 - 2.6
Merchandise imports	2.7
Services trade	
Exports of services	2.8
Imports of services	2.9
Goods and services balance	2.10
Other developments	2.11 - 2.13

CHAPTER 3 : DEVELOPMENTS IN SELECTED SECTORS

Property	3.1 - 3.12
Land	3.13
Tourism	3.14 - 3.16
Logistics	3.17 - 3.18
Transport	3.19
Innovation and technology	3.20
Arts and Culture	3.21
Environment	3.22 - 3.23

CHAPTER 4 : THE FINANCIAL SECTOR

Interest rates and exchange rates	4.1 - 4.5
Money supply and banking sector	4.6 - 4.10
The debt market	4.11 - 4.12
The stock and derivatives markets	4.13 - 4.16
Fund management and investment funds	4.17
Insurance sector	4.18
Highlights of policy and market developments	4.19 - 4.22

CHAPTER 5 : THE LABOUR SECTOR

Overall labour market situation	5.1
Labour force and total employment	5.2 - 5.3
Profile of unemployment	5.4 - 5.8
Underemployment situation	5.9
Profile of employment in establishments	5.10 - 5.11
Vacancies	5.12 - 5.13
Wages and earnings	5.14 - 5.17
Highlights of related measures and policy developments	5.18

CHAPTER 6 : PRICES

Consumer prices	6.1 - 6.3
Costs of factor inputs and import prices	6.4 - 6.5
Output prices	6.6
GDP deflator	6.7

STATISTICAL APPENDIX

CHAPTER 1 : OVERVIEW OF ECONOMIC PERFORMANCE

Summary

- *The Hong Kong economy recorded moderate growth in the first quarter of 2024. Exports of services remained as an important driver of growth, while total exports of goods improved further. Meanwhile, private consumption and overall investment expenditures showed mild expansion. Real Gross Domestic Product (GDP)⁽¹⁾ grew by 2.7% over a year earlier. On a seasonally adjusted quarter-to-quarter comparison⁽²⁾, real GDP increased by 2.3%.*
- *Hong Kong's total exports of goods rose in the first quarter over a year earlier as external demand turned slightly more favourable, though a very low base of comparison also contributed. Exports to the Mainland surged. Exports to the US declined marginally. Exports to the EU recorded a double-digit fall. Exports to other major Asian markets showed mixed performance. Meanwhile, exports of services continued to grow notably. Exports of travel services jumped further thanks to the continued revival of visitor arrivals. Exports of transport services continued to rise, and exports of business and other services showed modest growth. Yet, exports of financial services declined further.*
- *Domestically, private consumption expenditure rose mildly in the first quarter, supported by the continued increase in employment earnings and the Government's various initiatives to boost sentiment. Overall investment expenditure increased slightly alongside the economic expansion.*
- *The labour market remained tight in the first quarter. The seasonally adjusted unemployment rate stayed low at 3.0%. The underemployment rate was also low at 1.1%.*
- *The local stock market remained under pressure in the first quarter. Dampened by heightened geopolitical tensions and tempered expectations for US interest rate cuts, the Hang Seng Index (HSI) headed down on entering 2024. The HSI closed the quarter at 16 541, down by 3.0% from end-2023. After staying quiet in the first two months of 2024, the residential property market turned active in March as market sentiment improved after the cancellation of all demand-side management measures (DSMMs) for residential properties and the adjustments of macroprudential measures. Flat prices showed signs of stabilisation towards the end of the quarter.*

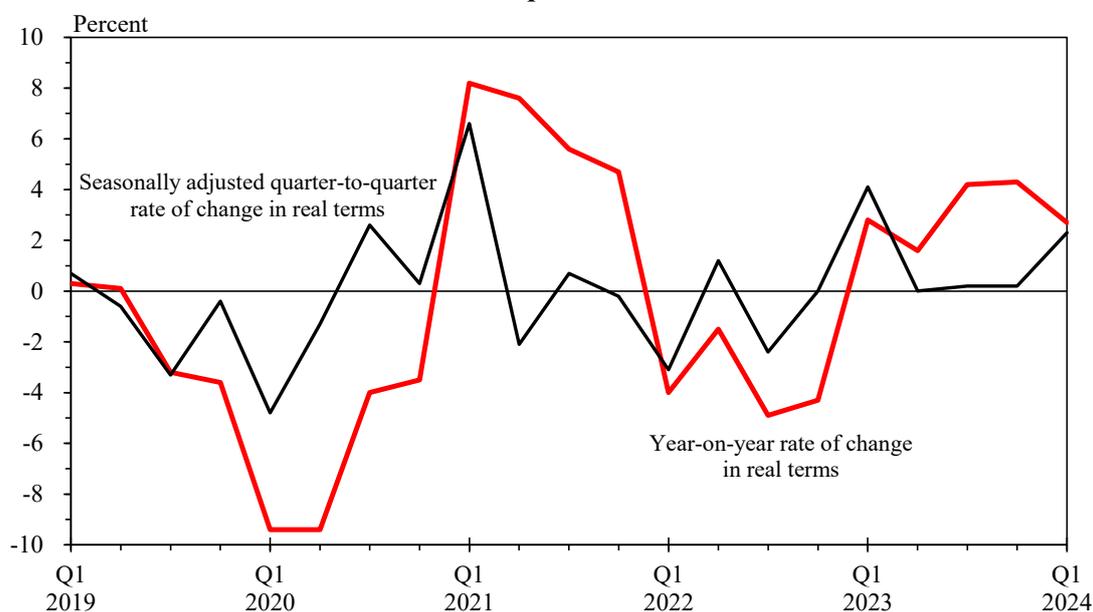

- *Underlying consumer price inflation was modest in the first quarter. While prices of meals out and takeaway food continued to rise relatively fast over a year earlier, prices of electricity dropped notably against a high base of comparison. Private housing rentals were largely steady. Price pressures on other major components were broadly in check.*

Overall situation

1.1 The Hong Kong economy recorded moderate growth in the first quarter of 2024. Exports of services remained as an important driver of growth, while total exports of goods improved further. Meanwhile, private consumption and overall investment expenditures showed mild expansion.

1.2 Real GDP grew by 2.7% year-on-year in the first quarter (same as the advance estimate), having increased by 4.3% in the preceding quarter. On a seasonally adjusted quarter-to-quarter comparison, real GDP increased by 2.3% (same as the advance estimate), after a 0.2% increase in the preceding quarter.

Diagram 1.1 : The Hong Kong economy recorded moderate growth in the first quarter of 2024

The external sector

1.3 After growing by 2.8% year-on-year in real terms in the preceding quarter, *total exports of goods* based on the GDP compilation framework rose by 6.8% in the first quarter of 2024 as external demand turned slightly more favourable, though a very low base of comparison also contributed. Analysed by major market and by reference to external merchandise trade statistics, exports to the Mainland surged against a very low base of comparison. Exports to the US declined marginally. Exports to the EU recorded a double-digit fall. Exports to other major Asian markets showed mixed performance.

1.4 *Exports of services* continued to grow notably by 8.4% year-on-year in real terms in the first quarter, after expanding by 21.2% in the preceding quarter. Exports of travel services jumped further by 40.4% and recovered to 53% of the level in the same quarter in 2018, thanks to the continued revival of visitor arrivals. Exports of transport services continued to rise. Exports of business and other services showed modest growth amid the complicated external environment. Meanwhile, exports of financial services declined further as cross-border financial and fund raising activities remained weak amid tight financial conditions.

Table 1.1 : Gross Domestic Product, its main expenditure components and the main price indicators (year-on-year rate of change (%))

	<u>2022</u> [#]	<u>2023</u> [#]	<u>Q1</u> [#]	<u>2023</u>		<u>Q4</u> [#]	<u>2024</u>

Notes : Figures are subject to revision later on as more data become available. The seasonally adjusted quarter-to-quarter rate of change is not applicable to gross domestic fixed capital formation, as no clear seasonal pattern is found for this category due to the presence of considerable short term fluctuations.

(&) Figures are compiled based on the change of ownership principle in recording goods sent abroad for processing and merchanting under the standards stipulated in the *System of National Accounts 2008*.

(#) Revised figures.

() Seasonally adjusted quarter-to-quarter rate of change⁽²⁾.

(^) After netting out the effects of the Government's one-off relief measures.

(*) Change within $\pm 0.05\%$.

The domestic sector

1.5 Consumption activities showed mild expansion in the first quarter of 2024. The continued increase in employment earnings and the Government's various initiatives to boost sentiment rendered support. The hosting of more mega events also helped. After increasing by 3.5% year-on-year in real terms in the preceding quarter, *private consumption expenditure* rose by 1.0% in the first quarter. On a seasonally adjusted quarter-to-quarter basis, private consumption expenditure decreased by 0.9%. Meanwhile, *government consumption expenditure* declined by 3.0% year-on-year in the first quarter, after a 5.2% decrease in the preceding quarter.

**Table 1.2 : Consumer spending by major component^(a)
(year-on-year rate of change in real terms (%))**

Of which :

		Total consumer spending in the domestic market ^(a)	<u>Food</u>	<u>Durables</u>	<u>Non- durables</u>	<u>Services</u>	<u>Residents' expenditure abroad</u>	<u>Visitor spending</u>	<u>Private consumption expenditure^(b)</u>
2023	Annual	8.8	0.4	12.1	22.8	6.0	292.1	499.6	7.7
	Q1	14.2	7.2	24.9	32.2	9.5	317.7	485.0	13.0
	Q2	9.6	0.6	23.5	21.3	6.1	411.4	736.5	8.4
	Q3	7.7	-1.3	9.7	21.7	5.3	381.7	740.6	6.7
	Q4	4.6	-4.3	-1.5	18.1	3.4	179.8	300.5	3.5
2024	Q1	0.2	-4.2	-11.8	1.8	2.4	60.9	41.5	1.0

Notes : (a) Consumer spending in the domestic market comprises both local consumer and visitor spending.

(b) Private consumption expenditure is obtained by deducting visitor spending from total consumer spending in the domestic market, and adding back residents' expenditure abroad.

Diagram 1.2 : Private consumption expenditure expanded mildly

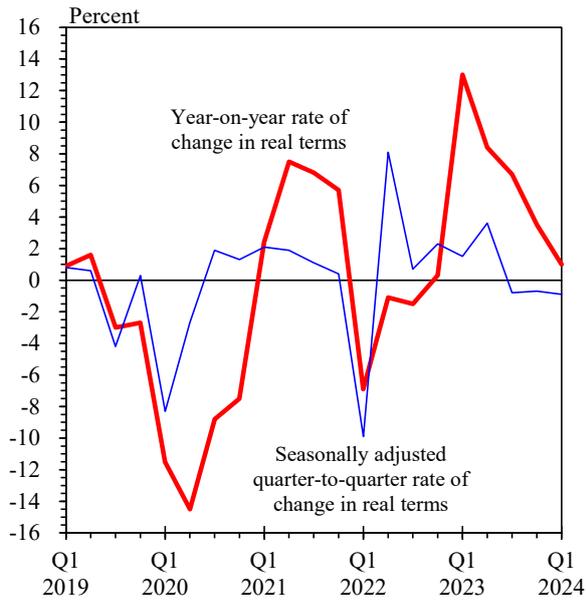

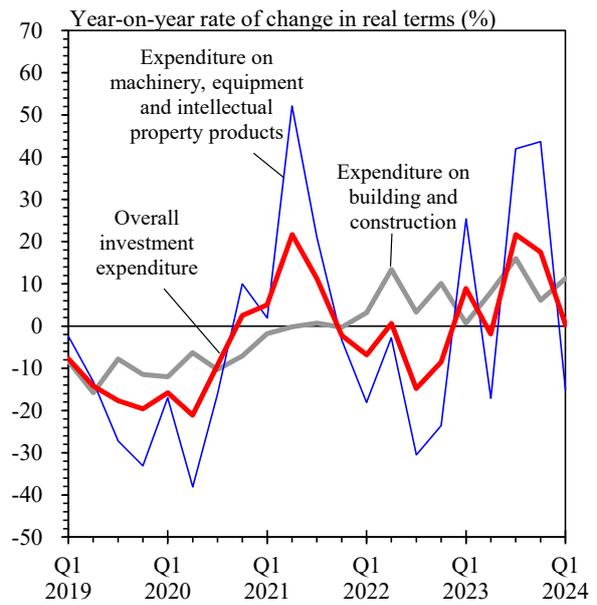

Diagram 1.3 : Overall investment expenditure grew slightly

1.6 Overall investment spending in terms of *gross domestic fixed capital formation* increased slightly by 0.3% in real terms in the first quarter over a year earlier alongside the economic expansion, further to a 17.5% increase in the preceding quarter. Expenditure on building and construction rose by 11.3%, with private sector spending increasing sharply and public sector spending recording modest gain. Expenditure on acquisitions of machinery, equipment and intellectual property products fell back by 15.0% amid tight financial conditions. Separately, the costs of ownership transfer fell as property transactions shrank.

Box 1.1

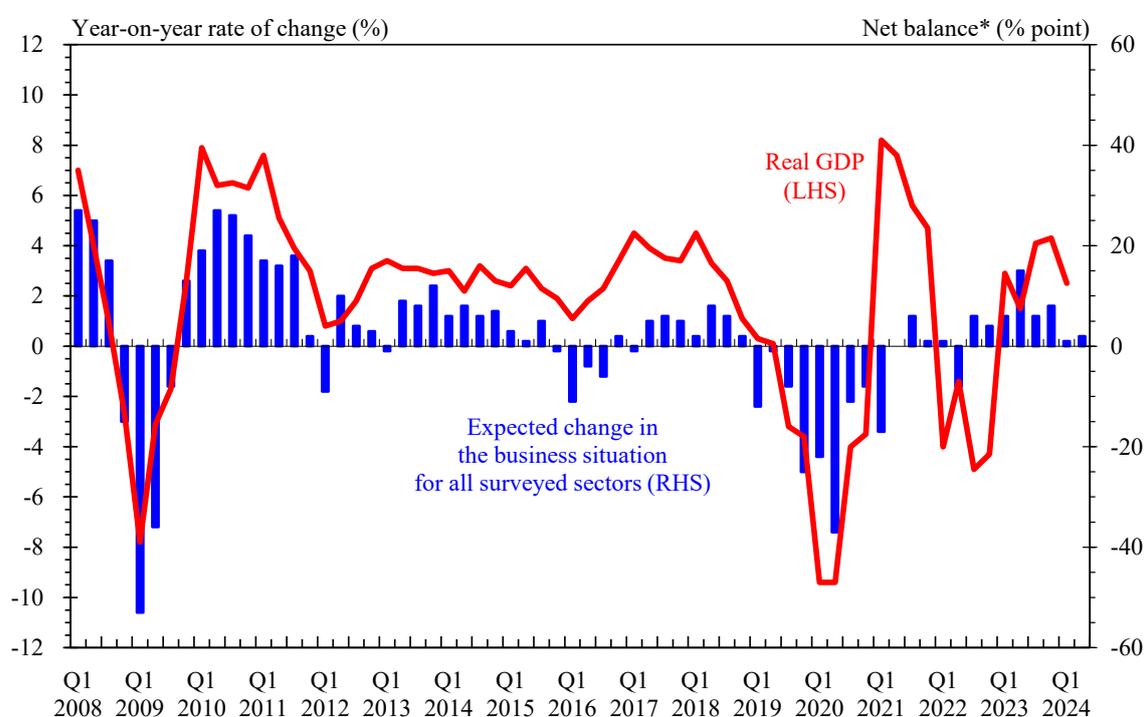

Business sentiment in Hong Kong

This box article gives a general overview of the prevailing business sentiment in Hong Kong, based on results from various surveys that are available in the public domain. Survey results indicate that overall business sentiment in the past few months was generally stable with some positive signs.

According to the results of the Census and Statistics Department (C&SD)'s Quarterly Business Tendency Survey (QBTS)⁽¹⁾ conducted during 2 March 2024 to 11 April 2024, business sentiment among large enterprises in Hong Kong was largely stable in overall terms as compared to three months ago (*Chart 1*). The proportion of large enterprises expecting their business situation to improve in the second quarter of 2024 over the first quarter was larger than the proportion of those expecting the situation to worsen by 2 percentage points (i.e. a net balance of +2), somewhat higher than the net balance of +1 in the previous round.

Business sentiment of large enterprises was positive in a majority of sectors (*Table 1*). The net balance for the “financing and insurance” and “manufacturing” sectors improved within the positive zone, while those for “real estate” and “information and communications” sectors reverted to positive. The net balances for the “accommodation and food services” and “transportation, storage and courier services” sectors remained positive notwithstanding mild moderations. Meanwhile, the net balances for “retail” and “professional and business services” sectors turned negative, while those of “construction” and “import/export trade and wholesale” sectors remained in the negative zone. Large enterprises' appetite for hiring was also stable (*Table 2*).

Chart 1 : Business sentiment of large enterprises was largely stable in overall terms

Note: (*) Net balance indicates the direction of expected change in the business situation versus the preceding quarter. It refers to the difference in percentage points between the proportion of establishments choosing “better” over that choosing “worse”. A positive sign indicates a likely upward trend while a negative sign, a likely downward trend.

(1) The Quarterly Business Tendency Survey collected views from around 500-600 large establishments on their near-term business outlook. Respondents were asked to exclude seasonal influences in their responses.

Box 1.1 (Cont'd)

Table 1 : Business sentiment of large enterprises was positive in a majority of sectors

QBTS: Expected changes in business situation						
	Net balance* (% point)					
	2023				2024	
	Q1	Q2	Q3	Q4	Q1	Q2
Manufacturing	+23	+36	+20	-2	+2	+8
Construction	-7	+6	+10	+1	-9	-11
Import/export trade and wholesale	-8	+10	+7	+5	-9	-9
Retail	+12	+34	+18	+32	+3	-16
Accommodation and food services	+39	+64	+41	+33	+9	+7

Information and communications	-1	+6	+2	+9	-4	+1
Financing and insurance	+25	+25	+4	+10	+14	+19
Real estate	+4	+13	-2	+6	-6	+8
Professional and business services	-3	-4	+5	+1	+1	-9
All sectors above	+6	+15	+6	+8	+1	+2

Note : (*) Net balance indicates the direction of expected change in the business situation versus the preceding quarter. It refers to the difference in percentage points between the proportion of establishments choosing “better” over that choosing “worse”. A positive sign indicates a likely upward trend while a negative sign, a likely downward trend.

Table 2 : Hiring sentiment of large enterprises was stable

QBTS: Expected changes in number of persons engaged						
	Net balance* (% point)					
	2023				2024	
	Q1	Q2	Q3	Q4	Q1	Q2
Manufacturing	+8	+18	+26	+11	+13	+7
Construction	+16	+6	+6	+2	-8	+11
Import/export trade and wholesale	-6	-1	-2	+1	-1	+1
Retail	+6	+20	+8	+14	+7	+6
Accommodation and food services	+24	+50	+31	+23	+21	+11
Transportation, storage and courier services	+9	0	+6	+8	+8	+9
Information and communications	-6	-6	-6	-2	-11	-15
Financing and insurance	+9	+13	+8	+10	+10	+12
Real estate	0	+9	+8	+19	+10	+15
Professional and business services	+5	+7	+4	+6	+6	+5
All sectors above	+6	+11	+8	+9	+6	+7

Note : (*) Net balance indicates the direction of expected change in the number of persons engaged versus the preceding quarter. It refers to the difference in percentage points between the proportion of establishments choosing “up” over that choosing “down”. A positive sign indicates a likely upward trend while a negative sign, a likely downward trend.

As for small and medium-sized enterprises (SMEs), C&SD compiles a set of diffusion indices on a monthly basis⁽²⁾ to gauge the general direction of change in their views on the business situation versus the preceding month. The overall index on the current situation rose from 43.3 in January to 45.5 in March, before easing back to 43.8 in April (*Chart 2a*). Employment sentiment among SMEs also showed some improvement over the same period while credit conditions stayed accommodative. Meanwhile, the Standard Chartered Hong Kong SME Leading Business Index⁽³⁾ rose back in the second quarter.

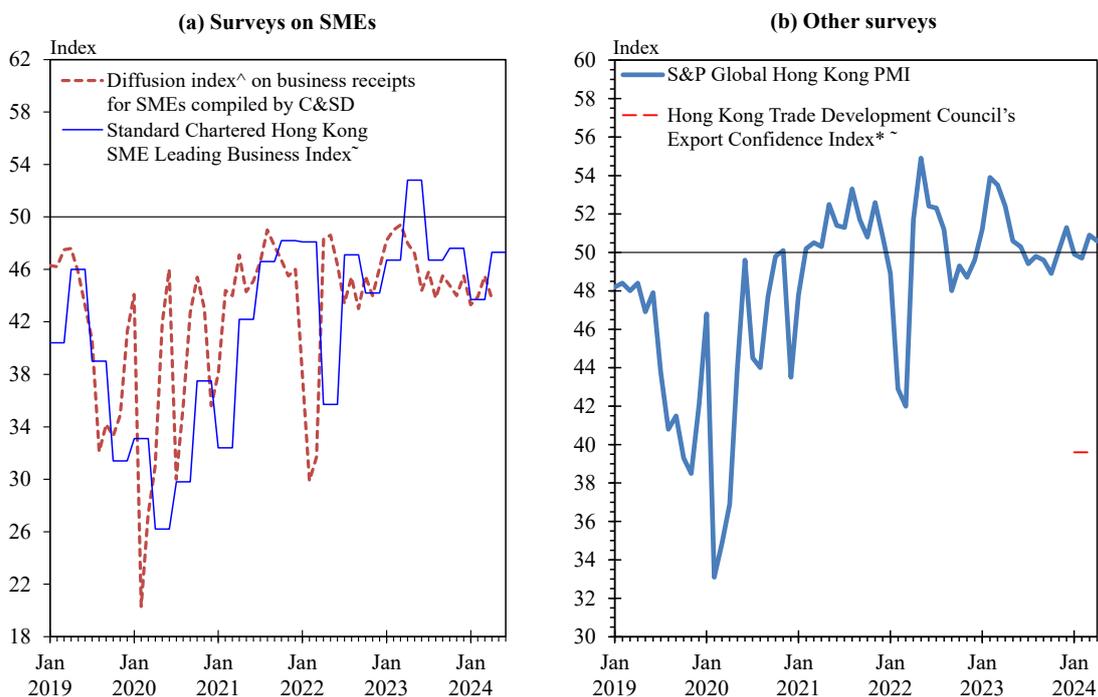

As for other surveys in the public domain, the S&P Global Purchasing Managers’ Index (PMI) of Hong Kong⁽⁴⁾, which gauges the performance of the private sector’s business activity, returned to the expansionary zone in March and April, with readings of 50.9 and 50.6 respectively. The Hong Kong Trade Development Council (HKTDC) Export Confidence Index⁽⁵⁾ suggested a subdued export environment for the time being, but exporters generally had stronger confidence in future performance. Among the exporters surveyed, 83.3% saw economic slowdown or recession risk in overseas markets as the major challenge to their businesses in the next twelve months, followed by rising transport costs (63.2%) and geopolitical impact on supply chains and production and/or sourcing (58.8%).

(2) It refers to the results from the Monthly Survey on the Business Situation of SMEs that solicits feedback from a panel sample of around 600 SMEs each month.

(3) Conducted independently by Hong Kong Productivity Council, the quarterly survey enables the public and SMEs to gain insights into the forthcoming business climate for better forward planning. The Overall Index comprises five areas, including local SMEs’ outlook on “Recruitment Sentiment”, “Investment Sentiment”, “Business Condition”, “Profit Margin”, and “Global Economy” for the next quarter.

Box 1.1 (Cont'd)

Chart 2 : Business sentiment indicators in the past few months were generally stable

Notes : (^) The diffusion index is computed by adding the percentage of SMEs reporting “up” to one half of the percentage of SMEs reporting “same”. A diffusion index reading above 50 indicates that the business condition is generally favourable, whereas an index below 50 indicates otherwise. Respondents were asked to exclude seasonal effects in reporting their views.

(~) Quarterly data.

(*) A reading above 50 indicates an upward trend and an optimistic outlook, while a reading below 50 indicates a downward trend and a pessimistic outlook.

It is worth noting that these surveys are essentially opinion-based, thereby unavoidably subject to various limitations (e.g. results are not directly comparable) and hence the results should be interpreted with care. These survey findings taken together suggest that overall business sentiment in the past few months was generally stable, with some positive signs seen in various surveys. Looking ahead, while the complicated external environment will still affect business sentiment in the near term, continued growth of the economy should provide support.

-
- (4) According to the press release by S&P Global, the S&P Global Hong Kong PMI is compiled according to monthly replies to questionnaires sent to purchasing managers in around 400 private sector companies. It is a composite index based on five individual indices with the following weights: New Orders (30%); Output (25%); Employment (20%); Suppliers’ Delivery Times (15%); and Stocks of Purchases (10%), with the Suppliers’ Delivery Times index inverted so that it moves in a comparable direction. Survey responses reflect the change, if any, in the prevailing month compared to the previous month.
- (5) The HKTDC Export Confidence Index, revamped from the previously HKTDC’s Export Index, aims to gauge the prospects of the near-term export performance of Hong Kong traders. It is a composite index based on five individual sub-indices with the following weight: Sales and New Orders (50.0%); Trade Value (12.5%); Cost (12.5%); Procurement (12.5%); and Inventory (12.5%), with the Cost index and Inventory index inverted so that they move in comparable direction. The business confidence survey is conducted on a quarterly basis, with more than 500 participating Hong Kong traders from six major industry sectors interviewed, namely electronics, clothing, toys, jewellery, timepieces and equipment/materials.

The labour sector

1.7 The labour market remained tight in the first quarter of 2024. The seasonally adjusted *unemployment rate* stayed low at 3.0%, slightly higher than the 2.9% in the preceding quarter. The *underemployment rate* was also low at 1.1%, though edging up from 1.0%. The unemployment rates of various major sectors stayed low in general. Wages and labour earnings continued to record decent year-on-year increases in the fourth quarter of 2023. More recent General Household Survey (GHS) data indicated that employment earnings continued to grow solidly in the first quarter of 2024 over a year earlier.

The asset markets

1.8 The *local stock market* remained under pressure in the first quarter of 2024. Dampened by heightened geopolitical tensions and tempered expectations for US interest rate cuts, the HSI slid to 14 961 on 22 January, the lowest since October 2022. It then recouped some of the lost ground as market sentiment improved alongside the accelerated growth of the Mainland economy. The HSI closed the quarter at 16 541, down by 3.0% from end-2023. Trading activities stayed soft in the first quarter but regained some momentum towards the end of the period. The average daily turnover increased by 9.2% over the preceding quarter to \$99.4 billion, though still down 22.3% from the year-ago level. Fund raising activities remained quiet.

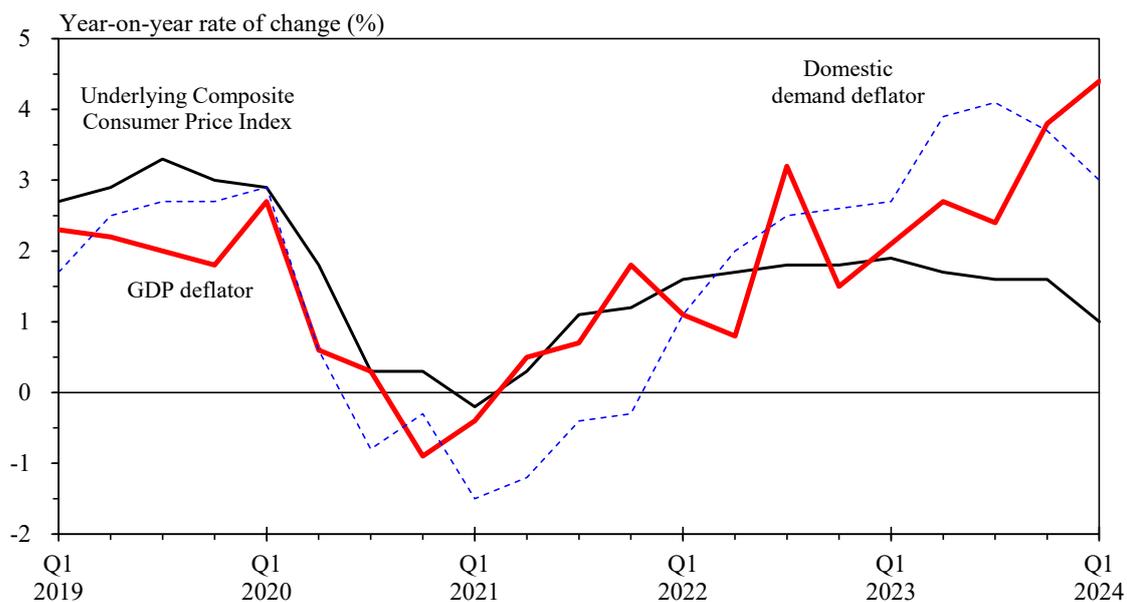

1.9 After staying quiet in the first two months of 2024, the *residential property market* turned active in March as market sentiment improved after the cancellation of all DSMMs for residential properties and the adjustments of macroprudential measures as announced in the 2024-25 Budget (the Budget). The number of transactions, in terms of the total number of sale and purchase agreements for residential property received by the Land Registry, rebounded by 29% from a low base in the preceding quarter to 9 823 for the first quarter, but the level was still 30% lower than a year earlier. Overall flat prices fell further by 3% during the first two months of 2024, but then rose back by 1% in March, culminating in a 2% decline during the first quarter. The index of home purchase affordability declined further to around 65% in the first quarter, but remained above the long-term average of 54% over 2004-2023. Meanwhile, overall flat rentals were little changed during the first quarter. The *non-residential property market* stayed lacklustre in the first quarter. Trading activities for all major market segments declined further, while prices and rentals stayed soft.

Inflation

1.10 Underlying consumer price inflation was modest in the first quarter of 2024. While prices of meals out and takeaway food continued to rise relatively fast over a year earlier, prices of electricity dropped notably against a high base of comparison. Private housing rentals were largely steady. Price pressures on other major components were broadly in check. Netting out the effects of the Government's one-off relief measures, *underlying Composite CPI inflation rate* was 1.0% in the first quarter, compared with 1.6% in the preceding quarter. Domestic business cost pressures stayed generally contained. Nominal wages continued to record moderate growth, while commercial rentals remained soft. External price pressures on consumption-related items moderated. Meanwhile, *headline Composite CPI inflation rate* was 1.9% in the first quarter, compared with 2.6% in the preceding quarter. The headline inflation rate was higher than its underlying counterpart in the first quarter as the provision of rates concession by the Government in the same quarter last year resulted in a low base of comparison.

1.11 As a broad measure of the overall change in prices in the economy, the *GDP deflator* rose further by 4.3% year-on-year in the first quarter, after increasing by 3.8% in the preceding quarter. The *terms of trade* increased further by 0.7%. Taking out the external trade components, the domestic demand deflator increased by 3.0% over a year earlier in the first quarter, after rising by 3.7% in the preceding quarter.

Diagram 1.4 : Underlying consumer inflation was modest in the first quarter of 2024

Note : The year-on-year rates of change of the Composite Consumer Price Index from the fourth quarter of 2020 onwards are computed from the new 2019/20-based series, and those before are from the old 2014/15-based series.

GDP by major economic sector

1.12 The net output of the services sector rebounded by 3.7% in real terms in 2023, after a 3.4% decline in 2022. The year-on-year growth rates were 3.4%, 1.7%, 4.2% and 5.3% respectively in the four quarters. Following the removal of anti-epidemic measures and resumption of normal travel with the Mainland and the rest of the world in early 2023, net outputs of many major service sectors showed improvements. In particular, the net outputs of transportation and storage, accommodation and food services, and wholesale and retail trades rebounded strongly and posted double-digit increases in the year. Those of real estate, as well as professional and business services also resumed growth. Net outputs of public administration, social and personal services, as well as information and communications increased further, while those of financing and insurance, and import and export trade saw narrowed declines. Yet, the net output of postal and courier services recorded widened fall. As for the secondary sector, the net outputs of the manufacturing sector and the construction sector continued to increase.

Notes : Figures are subject to revision later on as more data become available.

(a) The GDP figures shown in this table are compiled from the production approach, while those shown in Table 1.1 are compiled from the expenditure approach. For details, see Note (1) to this chapter.

(b) In the context of value-added contribution to GDP, the services sectors include ownership of premises as well, which is analytically a service activity.

(*) Change within $\pm 0.05\%$.

Other economic developments

1.13 The Budget rolled out a series of measures aimed at bolstering confidence and creating favourable conditions for recovery. These included continuing to attract enterprises, capital and talent on all fronts, as well as providing assistance to small and medium-sized enterprises (SMEs) through various measures, such as extending the application period for the 80% and 90% Guarantee Products under the SME Financing Guarantee Scheme for two years. For the property market, the Budget announced the immediate cancellation of all DSMMs for residential properties, including the Special Stamp Duty, the Buyer's Stamp Duty and the New Residential Stamp Duty. The Budget also highlighted the promotion of a mega event economy to attract tourists and bring wider entertainment and leisure choices for local residents. By creating a vibrant atmosphere, these events can stimulate spending and drive business of different sectors, such as tourism, hotel, catering and retail. Furthermore, staging more mega events can showcase Hong Kong's charm and reinforce the city's status as an events capital.

1.14 The Budget also placed significant emphasis on long-term planning for development. Among others, innovation and technology (I&T) and financial services were considered the two main engines driving Hong Kong towards high-quality development. For I&T, building upon the investments made over the years, the Budget sought to accelerate the development of such areas as artificial intelligence, life and health technology, and new industrialisation. On financial services, the Budget highlighted ongoing efforts to enhance mutual market access with the Mainland, and strengthen the development of our asset and wealth management, securities and bond markets.

Notes :

- (1) The Gross Domestic Product (GDP) is an overall measure of net output produced within an economy in a specified period, such as a calendar year or a quarter, before deducting the consumption of fixed capital. In accordance with the expenditure approach to its estimation, GDP is compiled as total final expenditures on goods and services (including private consumption expenditure, government consumption expenditure, gross domestic fixed capital formation, changes in inventories, and exports of goods and services), less imports of goods and services.
- (2) The seasonally adjusted quarter-to-quarter GDP series, by removing the variations that occur at about the same time and in about the same magnitude each year, provides another perspective for discerning the trend, particularly in regard to turning points. A detailed examination reveals the presence of seasonality in the overall GDP and in some of its main components, including private consumption expenditure, government consumption expenditure, exports of goods, imports of goods, exports of services, and imports of services. However, due to the presence of considerable short-term fluctuations, no clear seasonal pattern is found in gross domestic fixed capital formation. Therefore, the seasonally adjusted series of GDP is compiled separately at the overall level, rather than summing up from its main components.

CHAPTER 2 : THE EXTERNAL SECTOR

Summary

- *The external environment remained rather complicated in the first quarter of 2024. On one hand, global economic growth held up relatively well. On the other hand, the disinflation process in the US decelerated, constraining the extent of possible interest rate cuts this year. In April, the International Monetary Fund (IMF) revised up its forecast for this year's global economic growth slightly to 3.2%⁽¹⁾.*
- *Hong Kong's merchandise exports rose by 7.1% year-on-year in real terms⁽²⁾ in the first quarter as external demand turned slightly more favourable, though a very low base of comparison also contributed. Exports to the Mainland surged. Exports to the US declined marginally. Exports to the EU recorded a double-digit fall. Exports to other major Asian markets showed mixed performance.*
- *Exports of services continued to grow notably by 8.4% year-on-year in real terms in the first quarter. Exports of travel services jumped further thanks to the continued revival of visitor arrivals. Exports of transport services continued to rise, and exports of business and other services showed modest growth. Meanwhile, exports of financial services declined further.*
- *In the 2024-25 Budget (the Budget), the Financial Secretary announced a plan to develop Hong Kong into a multinational supply chain management centre in line with the trend of Mainland manufacturing enterprises extending their production supply chains abroad. Meanwhile, the Government continued to strengthen Hong Kong's economic links with other economies, with a protocol signed in January to amend the Free Trade Agreement (FTA) between the Association of Southeast Asian Nations (ASEAN) and Hong Kong, and an Investment Promotion and Protection Agreement (IPPA) signed with Bahrain in March. The Chief Executive and various Principal Officials visited different Mainland cities to enhance co-operation and exchange in various policy areas.*

Merchandise trade

External environment

2.1 The external environment remained rather complicated in the first quarter of 2024. The Mainland economy continued to expand at a solid pace and the US economy grew further with resilient domestic demand, while the euro area economy remained weak. Meanwhile, the disinflation process in the US decelerated, constraining the extent of possible interest rate cuts this year. In April, the IMF revised up the forecast for this year's global economic growth slightly by 0.1 percentage point to 3.2%, same as the estimated growth in 2023 but visibly lower than the average annual growth of 3.8% during 2000 to 2019. The IMF also cited downside risks to the global economic outlook, such as commodity price spikes amid geopolitical tensions, persistent core inflation triggering a rise in interest rate expectations and a fall in asset prices thereby raising risks to financial stability, intensifying geoeconomic fragmentation, and the impact of fiscal consolidation and risks of debt distress.

2.2 The growth momentum of the Mainland economy strengthened further in the first quarter. Real GDP growth accelerated to 5.3% year-on-year, supported by consumption and investment. The authorities have strengthened policy support to bolster domestic demand and market confidence. On fiscal policy, the authorities will increase bond issuance this year, and most of the proceeds of the additional RMB 1 trillion treasury bonds issued in the fourth quarter of 2023 will be used this year. On monetary policy, the People's Bank of China reduced the reserve requirement ratios of financial institutions by 50 basis points in February, and the over-5-years loan prime rate went down by 25 basis points.

2.3 As for the advanced economies, the US economy grew by 1.6% in the first quarter on an annualised seasonally-adjusted quarter-to-quarter basis. While the growth rate was slower than in the preceding quarter, domestic demand remained resilient. The easing of inflation decelerated. The Federal Reserve (Fed) kept the target range for the federal funds rate unchanged during the quarter, and continued to reduce the size of its balance sheet as planned. The market has lowered its expectation of the extent of possible interest rate cuts by the Fed this year. In the euro area, the economy remained weak in the first quarter, growing by 0.3% over the preceding quarter on a seasonally-adjusted basis. Inflation continued to ease. The European Central Bank held its key interest rates unchanged in the first quarter, and said that it would be appropriate to ease

monetary policy if upcoming data reinforced confidence that inflation was converging to their target in a sustained manner.

2.4 Meanwhile, other major Asian economies continued to expand in the first quarter on the back of further growth of domestic demand and recovery of exports. Intra-regional trade showed further improvement in tandem. On monetary policy, most central banks in the region kept their monetary policies unchanged during the quarter. Yet, the central bank of Taiwan raised interest rates in March to contain local price pressures. The Bank of Japan also raised key interest rate in March, ending the negative interest rate policy since 2016.

Merchandise exports

2.5 After growing by 1.4% year-on-year in real terms in the preceding quarter, Hong Kong's *merchandise exports* rose by 7.1% in the first quarter of 2024 as external demand turned slightly more favourable, though a very low base of comparison also contributed.

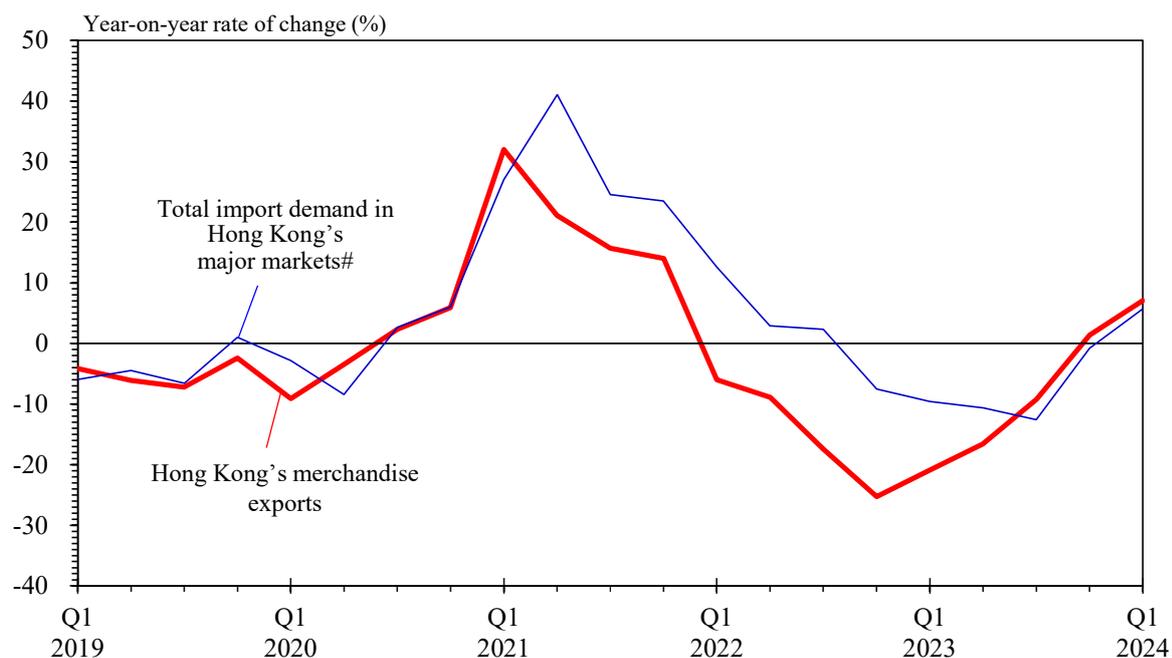

**Table 2.1 : Merchandise exports
(year-on-year rate of change (%))**

		<u>In value terms</u>	<u>In real terms^(a)</u>		<u>Change in prices</u>
2023	Annual	-7.8	-11.6		4.4

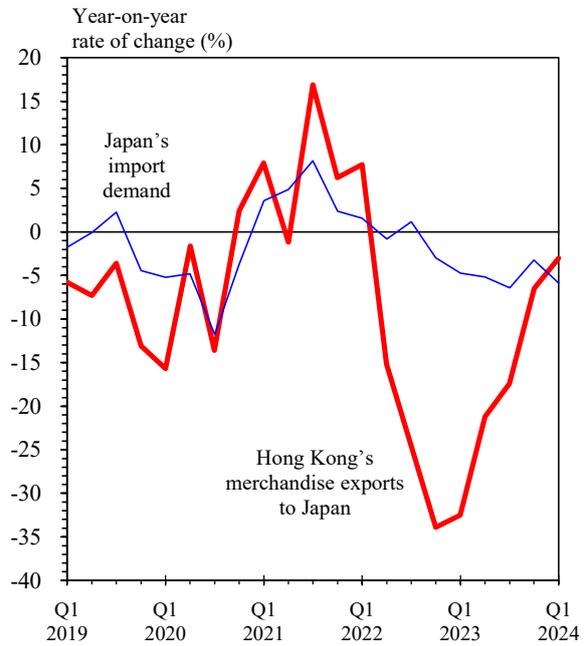

Diagram 2.8 : Exports to India expanded further

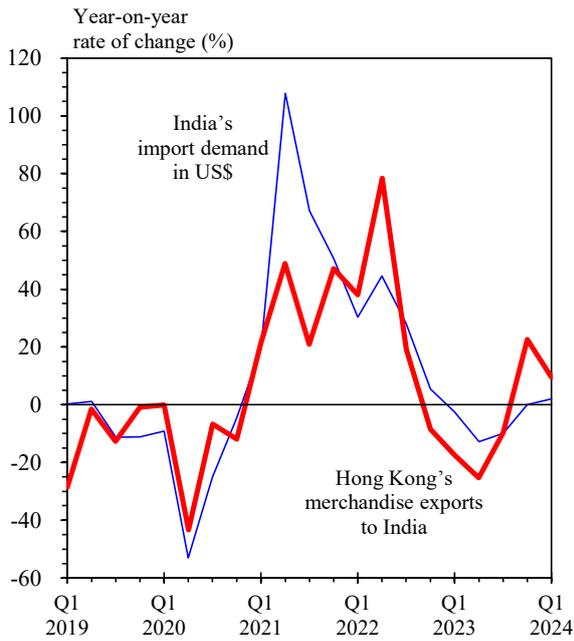

Diagram 2.9 : Exports to Taiwan turned to a decrease

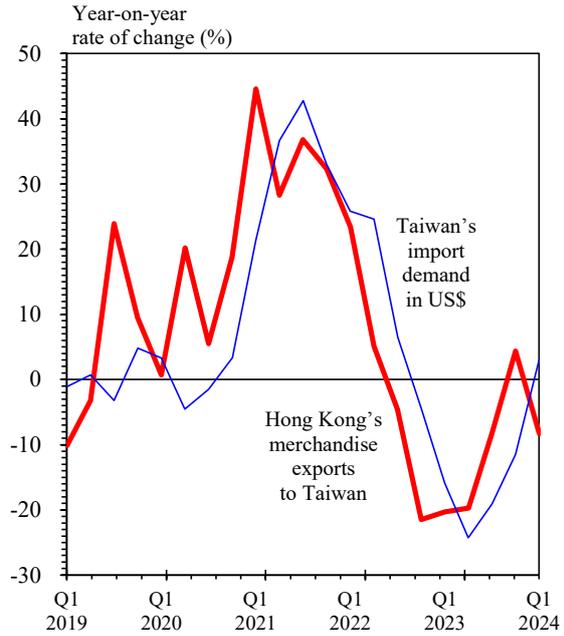

Diagram 2.10 : Exports to Korea continued to shrink

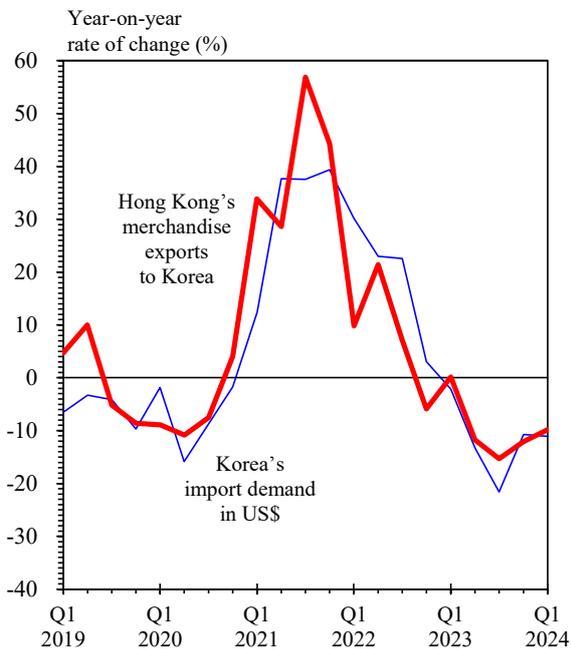

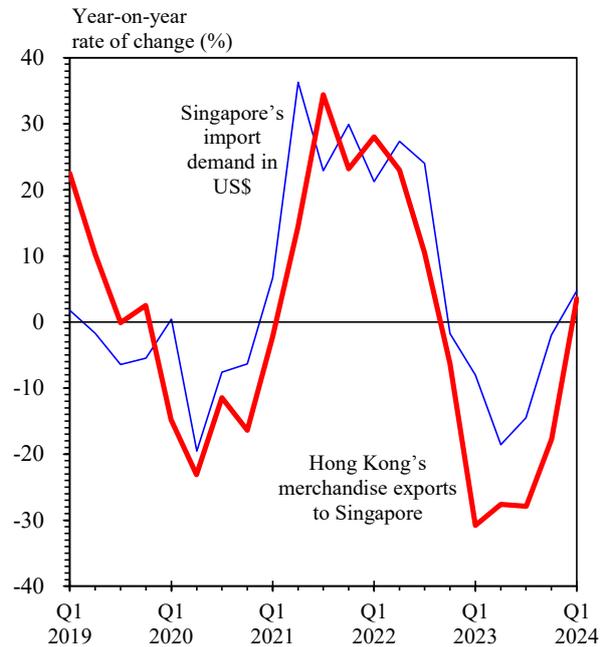

Diagram 2.11 : Exports to Singapore reverted to a moderate increase

Merchandise imports

2.7 *Merchandise imports* increased by 3.3% year-on-year in real terms in the first quarter of 2024, after growing by 2.6% in the preceding quarter. *Retained imports*, which refer to imports for domestic use and accounted for around one-fifth of merchandise imports in 2023, declined by 10.8%. Imports for subsequent *re-exports*⁽³⁾ grew.

**Table 2.3 : Merchandise imports and retained imports
(year-on-year rate of change (%))**

Notes : (a) Based on the results of the Annual Survey of Re-export Trade conducted by the Census and Statistics Department, re-export margins by individual end-use category are estimated and adopted for deriving the value of imports retained for use in Hong Kong.

(+) The growth rates here are not strictly comparable with those in the GDP accounts in Table 1.1. Figures in Table 1.1 are compiled based on the change of ownership principle in recording goods sent abroad for processing and merchanting under the standards stipulated in the *System of National Accounts 2008*.

() Seasonally adjusted quarter-to-quarter rate of change.

Diagram 2.12 : Merchandise imports increased year-on-year

Services trade

Exports of services

2.8 *Exports of services* continued to grow notably by 8.4% year-on-year in real terms in the first quarter of 2024, after expanding by 21.2% in the preceding quarter. Exports of travel services jumped further by 40.4% and recovered to 53% of the level in the same quarter in 2018, thanks to the continued revival of visitor arrivals. Exports of transport services continued to rise. Exports of business and other services showed modest growth amid the complicated external environment. Meanwhile, exports of financial services declined further as cross-border financial and fund raising activities remained weak amid tight financial conditions.

Diagram 2.13 : The contribution from travel services continued to rise, but remained lower than the pre-pandemic level

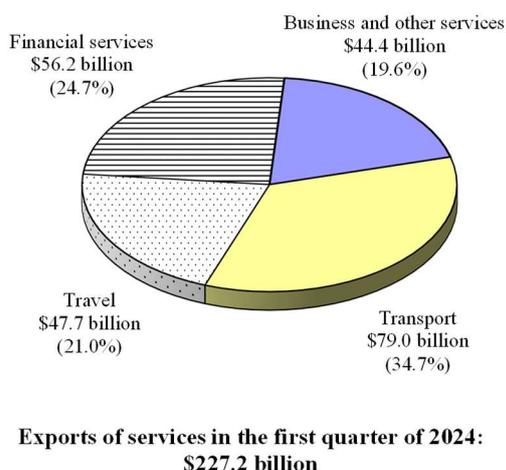

Diagram 2.14 : Exports of services continued to grow notably year-on-year

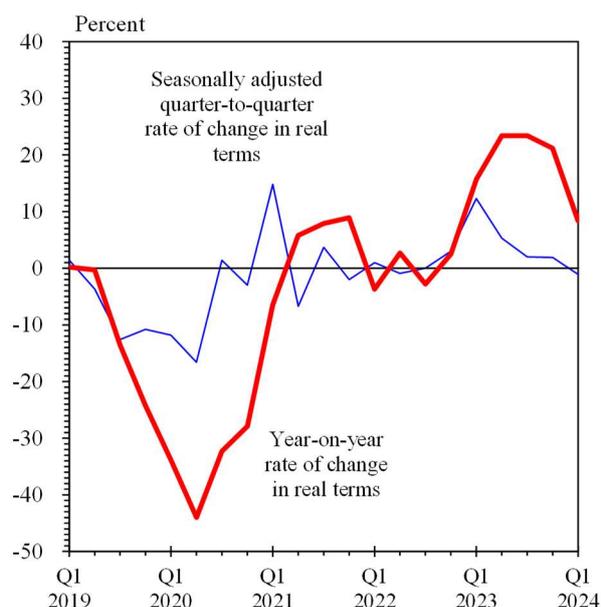

Table 2.4 : Exports of services by major service group (year-on-year rate of change in real terms (%))

		<i>Of which :</i>					
		Exports of services		<u>Transport</u>	<u>Travel^(a)</u>	<u>Financial services</u>	<u>Business and other services</u>

(a) Comprising mainly inbound tourism receipts.

() Seasonally adjusted quarter-to-quarter rate of change.

Imports of services

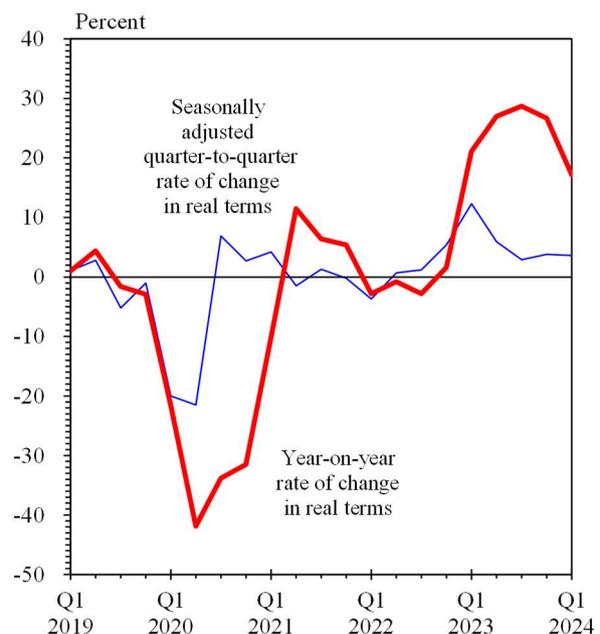

2.9 *Imports of services* expanded strongly by 17.2% in real terms in the first quarter of 2024 over a year earlier, further to the 26.7% growth in the preceding quarter. This was mainly driven by the surge in imports of travel services. Imports of transport services, manufacturing services, and business and other services recorded growth of various paces.

Diagram 2.15 : Business and other services had the largest share in imports of services

Imports of services in the first quarter of 2024:
\$176.4 billion

(+) Comprising mainly outbound travel spending.

(^) This includes the value of processing fees paid by Hong Kong to the processing units outside Hong Kong and raw materials / semi-manufactures directly procured by these processing units.

() Seasonally adjusted quarter-to-quarter rate of change.

Goods and services balance

2.10 Based on the GDP compilation framework and compared to a year earlier, the goods deficit narrowed to \$7 billion in the first quarter of 2024, as the value of exports of goods saw a larger increase than that of imports. Meanwhile, the services surplus widened to \$51 billion. The combined goods and services account registered a surplus of \$44 billion in the first quarter of 2024, equivalent to 3.3% of total import value, compared to a surplus of \$9 billion or 0.7% in the first quarter of 2023.

**Table 2.6 : Goods and services balance
(\$ billion at current market prices)**

		<u>Total exports</u>		<u>Imports</u>		<u>Trade balance</u>			<u>As % of imports</u>
		<u>Goods</u>	<u>Services</u>	<u>Goods</u>	<u>Services</u>	<u>Goods</u>	<u>Services</u>	<u>Combined</u>

Notes : Figures are compiled based on the change of ownership principle in recording goods sent abroad for processing and merchanting under the standards stipulated in the *System of National Accounts 2008*.

Figures may not add up exactly to the total due to rounding.

Other developments

2.11 In the Budget, the Financial Secretary announced a plan to develop Hong Kong into a multinational supply chain management centre in line with the trend of Mainland manufacturing enterprises extending their production supply chains abroad. The Government, in coordination with “Team Hong Kong” organisations, will work together to study implementation details, including establishing a single window to provide one-stop services for the enterprises. Efforts will be stepped up to attract the enterprises to set up headquarters in Hong Kong for managing their offshore trading. A further injection of \$500 million into the Dedicated Fund on Branding, Upgrading and Domestic Sales to help small and medium enterprises boost their competitiveness and tap into the Mainland and overseas markets was also announced.

2.12 Meanwhile, the Government continued to strengthen Hong Kong’s economic links with other economies. A protocol was signed in January to update the Product Specific Rules (PSR) of origin under Hong Kong’s FTA with ASEAN, enhancing the coverage of the PSR from more than 200 categories of products to almost 600, thereby enabling Hong Kong businesses to more easily and effectively enjoy preferential tariff treatment when expanding into the growing ASEAN market. Moreover, an IPPA was signed with Bahrain in March to strengthen mutual investment protection, with a view to enhancing the confidence of investors, expanding investment flows and further strengthening the economic and trade ties between the two places. In the same month, the Chief Executive visited Beijing to attend the opening meeting of the second annual session of the 14th National People’s Congress, during which he called on central ministries to exchange views and enhance co-operation and exchange in areas of financial services and health. The Financial Secretary visited Hangzhou and Suzhou in April, to explore deepening co-operation with both places in areas such as trade and innovation and technology, and to jointly foster the development of new quality productive forces and accelerate the promotion of high-quality development.

2.13 In addition, a set of domestic regulation disciplines aiming to facilitate services trade agreed under the World Trade Organization (WTO) has entered into force since 27 February 2024. The disciplines aim to cut red tapes and lower trade costs by improving the transparency, predictability and effectiveness of the relevant domestic measures that businesses have to comply with to supply their services in a market. At the same time, Hong Kong businesses will benefit from a more transparent, predictable and efficient regulatory environment when they enter markets of economies participating in this plurilateral WTO initiative.

Notes :

- (1) The table below presents a more detailed comparison between the growth forecasts made by the IMF in April 2024 and those three months ago.

	<u>2023</u>	<u>2024</u>	
	(%)	<u>January round</u> (%)	<u>April round</u> (%)
World (PPP ^{##} weighted)	3.2	3.1	3.2
Advanced economies	1.6	1.5	1.7
US	2.5 [#]	2.1	2.7
Euro area	0.4 [#]	0.9	0.8
UK	0.1 [#]	0.6	0.5
Japan	1.9 [#]	0.9	0.9
Emerging market and developing economies	4.3	4.1	4.2
Emerging and developing Asia	5.6	5.2	5.2
Mainland China	5.2 [#]	4.6	4.6
India [^]	7.8	6.5	6.8
ASEAN-5 [§]	4.1	4.7	4.5
Middle East and Central Asia	2.0	2.9	2.8

- Notes : (#) Actual figures.
 (##) PPP refers to purchasing power parity.
 (^) Fiscal year.
 (§) Includes Indonesia, Malaysia, the Philippines, Singapore and Thailand.

- (2) Changes in merchandise exports and imports in real terms are derived by discounting the effect of price changes from changes in the value of the trade aggregates. Estimates of price changes for the trade aggregates are based on changes in unit values, which do not take into account changes in the composition or quality of the goods traded, except for some selected commodities for which specific price indices are available. The real growth figures reported here are based on the external trade quantum index series compiled using the chain linking approach, which were first released in March 2015 to replace the previous trade index numbers compiled using the Laspeyres method with a fixed base year. The series are not comparable with the real trade aggregates under GDP (reported in Chapter 1) which are compiled based on the change of ownership principle in recording goods sent abroad for processing and merchanting under the standards stipulated in the *System of National Accounts 2008*. Apart from this, non-monetary gold is recorded as a separate item in the statistics of merchandise trade and not included in the trade aggregates reported in Chapter 2, but is included in the trade aggregates under GDP in accordance with the international compilation standard.
- (3) Re-exports are those goods which have previously been imported into Hong Kong and are subsequently exported without having undergone in Hong Kong any manufacturing processes which change permanently the shape, nature, form or utility of the goods.

CHAPTER 3 : DEVELOPMENTS IN SELECTED SECTORS

Summary

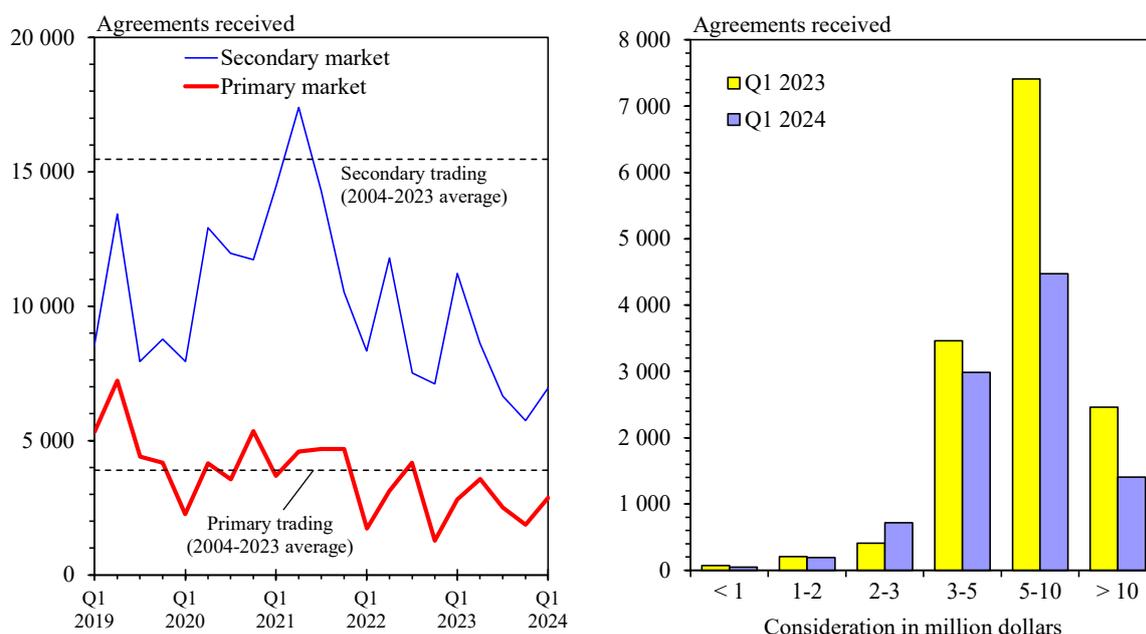

- *After staying quiet in the first two months of 2024, the residential property market turned active in March as market sentiment improved after the cancellation of all demand-side management measures (DSMMs) for residential properties and the adjustments of macroprudential measures. Flat prices showed signs of stabilisation towards the end of the quarter.*
- *Reflecting the Government's sustained efforts to raise land and flat supply, the total private first-hand flat supply in the coming three to four years would rise to 112 000 units as estimated at end-March 2024.*
- *The non-residential property market stayed lacklustre in the first quarter. Trading activities for all major market segments declined further, while prices and rentals stayed soft.*
- *The tourism sector continued to improve in the first quarter. Visitor arrivals rose further from 10.7 million in the fourth quarter of 2023 to 11.2 million in the first quarter of 2024, equivalent to 72% of the level in the same period in 2018.*
- *The logistics sector showed mixed performance in the first quarter. Total container throughput declined further by 2.7% from a year earlier, while air freight throughput increased by 18.9%.*

Property

3.1 After staying quiet in the first two months of 2024, the *residential property market* turned active in March as market sentiment improved after the cancellation of all DSMMs (namely Special Stamp Duty, Buyer’s Stamp Duty and New Residential Stamp Duty) for residential properties and the adjustments of macroprudential measures as announced in the 2024-25 Budget (the Budget). Flat prices showed signs of stabilisation towards the end of the quarter.

3.2 The total number of sale and purchase agreements for residential property received by the Land Registry rebounded by 29% from a low base in the preceding quarter to 9 823 in the first quarter, but the level was still 30% lower than a year earlier. Within the total, primary and secondary market transactions increased by 54% and 21% over the preceding quarter respectively. In parallel, total consideration rose back by 12% over the preceding quarter to \$77.0 billion, but was still 36% lower than the same quarter last year.

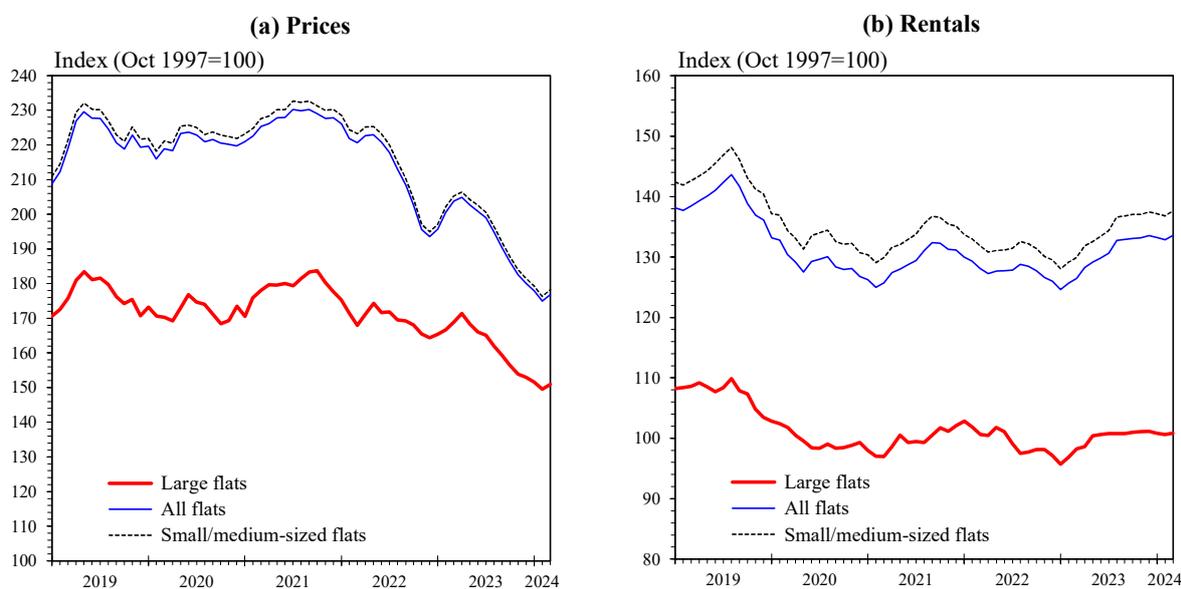

Diagram 3.1 : Trading activities rebounded in the first quarter of 2024 from a low base in the preceding quarter

3.3 Overall flat prices fell further by 3% during the first two months of 2024, but then rose back by 1% in March, the first monthly increase since April 2023. Taking the first quarter as a whole, flat prices declined by 2%. Analysed by size, prices of small/medium-sized flats and large flats dropped by 2% and 1% during the quarter respectively. Flat prices in March 2024 were on average 23% below the peak in September 2021.

3.4 Meanwhile, overall flat rentals were little changed during the first quarter after staying on a general uptrend for most of 2023. Analysed by size, rentals of small/medium-sized flats and large flats both showed little change. The average rental yield for residential property edged up from 2.8% in December 2023 to 2.9% in March 2024.

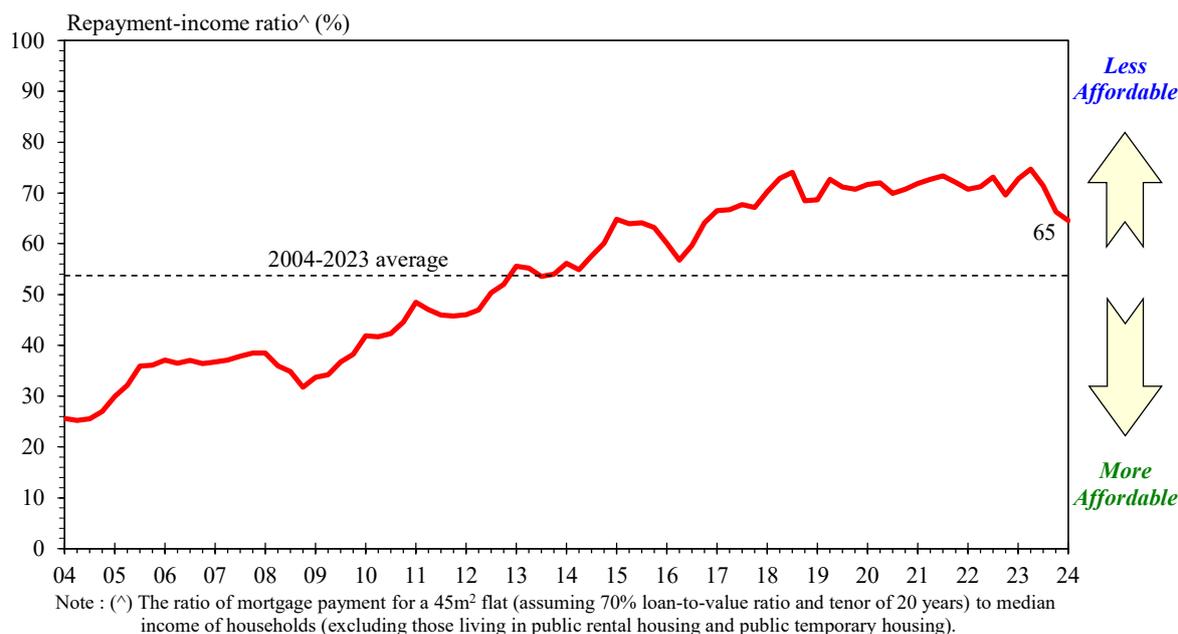

Diagram 3.2 : Flat prices showed signs of stabilisation towards the end of the first quarter; rentals were little changed during the quarter

Note : Residential property price index pertains to secondary market transactions only. Large flats refer to those with a saleable area of at least 100 m², and small/medium-sized flats with a saleable area of less than 100 m².

3.5 The index of home purchase affordability (i.e. the ratio of mortgage payment for a 45-square metre flat to median income of households, excluding those living in public rental housing and public temporary housing) declined further to around 65% in the first quarter alongside the fall in flat prices during the quarter, but it remained above the long-term average of 54% over 2004-2023⁽¹⁾.

Diagram 3.3 : The index of home purchase affordability declined further

3.6 Increasing housing land supply is a policy priority of the Government. In February, the Government announced the 2024-25 Land Sale Programme, which comprises eight residential sites capable of providing about 5 700 flats in total. Combining the various sources (including Government land sale, railway property development projects, the Urban Renewal Authority’s projects, and private development and redevelopment projects), the total private housing land supply in the 2024-25 financial year is estimated to have a capacity to produce about 15 100 units, exceeding the private housing supply annual target of 13 200 units by around 15%.

3.7 Reflecting the Government’s sustained efforts to raise land and flat supply, the *total supply of first-hand flats in the private sector* in the coming three to four years (comprising unsold flats of completed projects, flats under construction but not yet sold and flats on disposed sites where construction can start any time) would rise to 112 000 units as estimated at end-March 2024. Another 3 100 units could be added to the total supply after the conversion of a number of residential sites into “disposed sites”.

3.8 The Government has also been adopting a pragmatic approach in continuously evaluating the residential property market situation. After prudent consideration of the latest market situation and the high level of housing supply in the coming few years, the Government cancelled all DSMMs for residential properties on 28 February 2024. The Hong Kong Monetary Authority (HKMA) also adjusted the countercyclical macroprudential measures for property mortgage loans in accordance with the evolving market situation on the same day⁽²⁾.

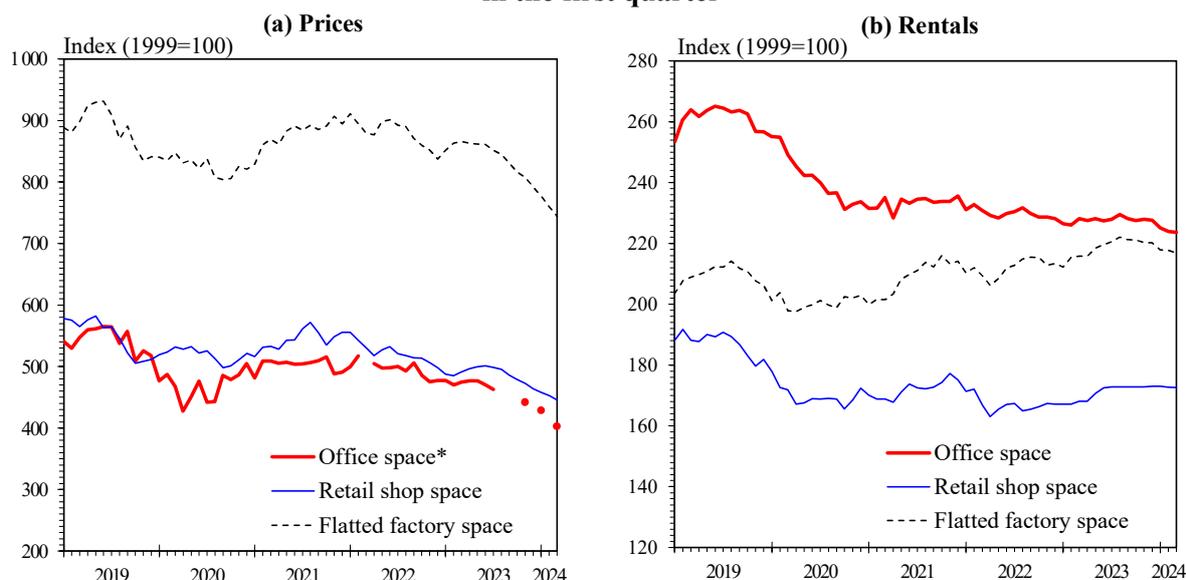

3.9 The *non-residential property market* stayed lacklustre in the first quarter. Trading activities for all major market segments declined further, while prices and rentals stayed soft.

3.10 Price index for overall office space was not available in December 2023 as there were insufficient transactions for Grade A office space in that month. Comparing the data in March 2024 with those in November 2023, prices for *office space* on average fell by 9%. Analysed by grade, prices of Grade A, B and C office space declined by 10%, 10% and 8% respectively. Meanwhile, overall office rentals on average fell by 2% between December 2023 and March 2024. Within the total, rentals of Grade A, B, and C office space retreated by 2%, 1% and 3% respectively. Compared with the respective peaks in 2018 and 2019, prices and rentals in March 2024 on average were 33% and 16% lower. The average rental yields of Grade A, B and C office space rose to 2.9%, 3.3% and 3.5% respectively in March 2024, from 2.6%, 3.0% and 3.3% in November 2023. Transactions for office space declined by 2% from the preceding quarter or by 28% from a year earlier to 131 cases in the first quarter, considerably below the quarterly average of 197 cases in 2019-2023.

3.11 Prices of *retail shop space* declined by 4% between December 2023 and March 2024, while rentals were little changed. Compared with the respective peaks in 2018 and 2019, prices and rentals in March 2024 were 26% and 10% lower. The average rental yield edged up from 2.9% in December 2023 to 3.0% in March 2024. For all commercial spaces, transactions decreased by 12% from the preceding quarter or by 37% from a year earlier to 197 cases⁽³⁾ in the first quarter, far below the quarterly average of 363 cases in 2019-2023.

3.12 Prices and rentals of *flatted factory space* fell by 6% and 1% respectively during the quarter. Compared with the respective peaks in 2019 and 2023, prices and rentals in March 2024 were 20% and 2% lower. The average rental yield rose from 3.3% in December 2023 to 3.5% in March 2024. Transactions fell by 4% from the preceding quarter or by 32% from a year earlier to 356 cases in the first quarter, far below the quarterly average of 602 cases in 2019-2023.

Diagram 3.4 : Prices and rentals of non-residential properties stayed soft in the first quarter

Note : (*) The price index of overall office space cannot be compiled in March 2022, August to October and December 2023, and February 2024, as there were insufficient transactions for Grade A or Grade B office space in those months.

Land

3.13 No land site was disposed in the first quarter. Meanwhile, one land exchange case and lease modifications of four sites were approved in the first quarter.

Tourism

3.14 The tourism sector continued to improve. *Visitor arrivals* rose further from 10.7 million in the fourth quarter of 2023 to 11.2 million in the first quarter of 2024, equivalent to 72% of the level in the same period in 2018. Mainland visitors, which accounted for 77% of the total in the first quarter, increased from 8.1 million in the preceding quarter to 8.7 million. There were 1.8 million and 0.8 million visitors from other short-haul markets and long-haul markets respectively, slightly down from the preceding quarter⁽⁴⁾. Analysed by length of stay, overnight and same-day visitors both rose to 5.6 million. Visitor spending, as measured by exports of travel services, jumped by 40.4% in real terms over a year earlier and recovered to 53% of the level in the same period in 2018.

2024	Q1	5 613 400	5 615 400

Note : Figures may not add up to total visitor arrivals due to rounding.

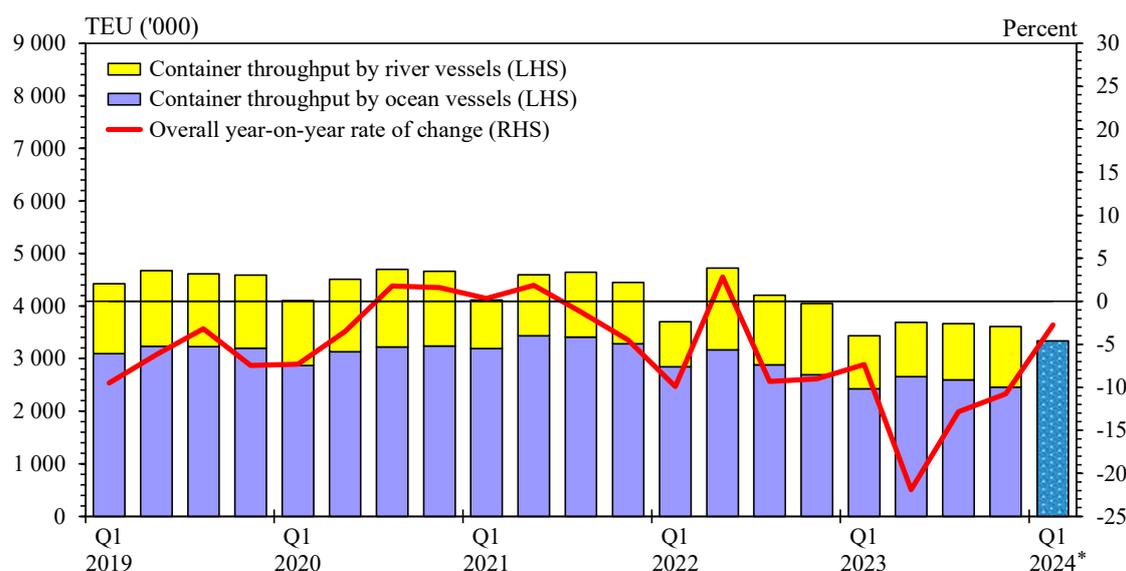

3.15 Hotel businesses continued to recover though the momentum has slowed somewhat. The average hotel room occupancy rate increased from 76% a year earlier to 85%, though it edged down from 86% in the fourth quarter of 2023 and remained below the 91% recorded in the same quarter in 2018. Meanwhile, the average achieved hotel room rate rose by 19.3% over a year earlier to \$1,431⁽⁵⁾.

3.16 The Financial Secretary announced various measures in the Budget to build Hong Kong as a premier destination for business and tourism, including an allocation of additional funding of over \$1.09 billion to the Tourism Commission and the Hong Kong Tourism Board for supporting their work. Highlights include the revamping of “A Symphony of Lights” light-and-sound show, organisation of regular pyrotechnic and drone shows against the backdrop of the splendid night views of Victoria Harbour and the promotion of immersive and in-depth tourism with themes like “Citywalk”. Meanwhile, \$100 million was earmarked to boost mega-event promotions over the next three years.

Logistics

3.17 The logistics sector showed mixed performance in the first quarter. *Total container throughput* declined further, albeit by a smaller 2.7% from a year earlier, to about 3.3 million twenty-foot equivalent units (TEUs). The value of trade handled at the Hong Kong port fell by 5.1% and its share in total trade dropped from 13.7% a year earlier to 11.9%.

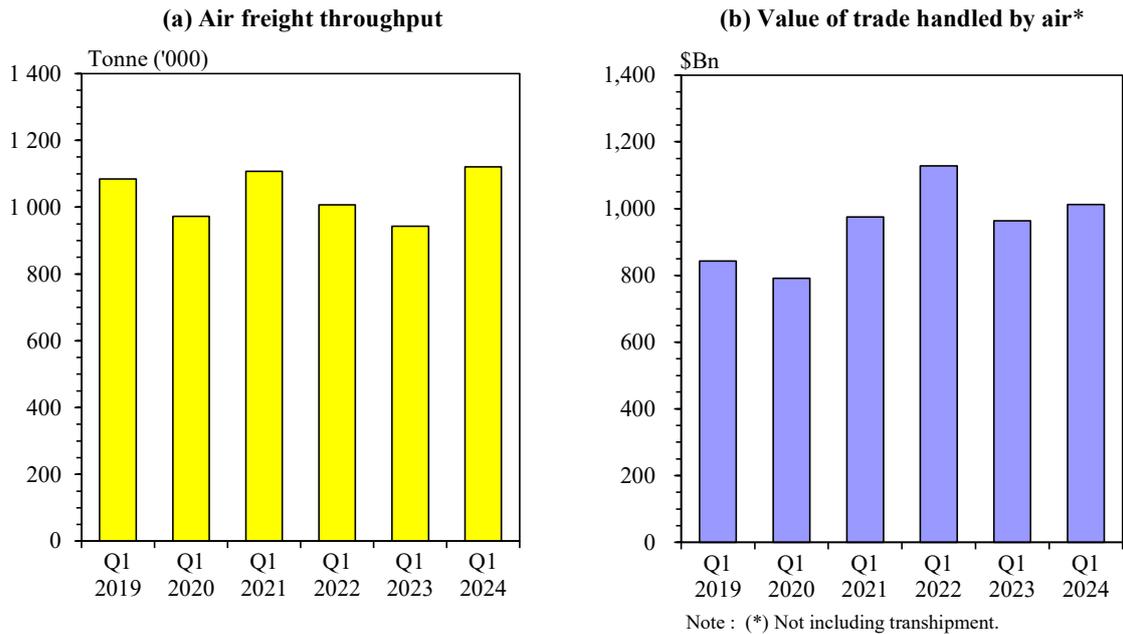

Diagram 3.5 : Container throughput declined further in the first quarter

Note : (*) The container throughput figure for the latest quarter is the preliminary estimate by the Hong Kong Maritime and Port Board, for which a breakdown by ocean and river vessels is not yet available.

3.18 *Air freight throughput* increased by 18.9% year-on-year to 1.1 million tonnes in the first quarter, partly due to a low base of comparison. The value of trade by air rose by 5.0%, though its share in total trade decreased from 48.2% to 46.1%.

Diagram 3.6 : Air freight throughput and the value of trade handled by air rose in the first quarter

Transport

3.19 Traffic flows for all modes of cross-boundary passenger transport continued to improve in the first quarter. Air passenger trips as well as water-borne and land-based cross-boundary passenger trips increased from 11.8 million, 2.3 million and 55.8 million trips in the preceding quarter to 12.7 million, 2.4 million and 58.3 million trips in the first quarter respectively. Air passenger trips and water-borne cross-boundary passenger trips returned to 69.3% and 36.8% of their corresponding levels in the same quarter in 2018, while land-based cross-boundary passenger trips were 4.7% higher than the level in the same quarter in 2018. Meanwhile, average daily cross-boundary vehicle movements rose by 5.4% over the preceding quarter to 38 811, equivalent to 92.9% of the daily average in the same quarter in 2018.

Innovation and technology

3.20 The Financial Secretary announced a number of measures to promote the development of innovation and technology in the Budget. The measures included (i) allocating \$3 billion to support local universities, research institutes and enterprises to leverage the computing power of the Artificial Intelligence (AI) Supercomputing Centre in phases from 2024 and to promote AI ecosystem development; (ii) establishing the Hong Kong Microelectronics Research and Development Institute in 2024 to support the research and development of third-generation semiconductors; (iii) launching a \$6 billion subsidy programme to support universities to set up life and health technology research institutes; (iv) setting up the Greater Bay Area International Clinical Trial Institute in Hetao Shenzhen Hong Kong Science and Technology Innovation Co-operation Zone this year to provide a one-stop clinical support platform that coordinates clinical trial resources, and to promote cooperation with the clinical trial network in the Mainland, in particular the Greater Bay Area; (v) allocating \$2 billion to support InnoHK research clusters to establish presence in the Lok Ma Chau Loop and another \$200 million to provide assistance to start-ups engaging in life and health technology in the Hong Kong-Shenzhen I&T Park (HSITP) in the form of incubation and acceleration programmes, etc., thereby facilitating the setting up of the InnoLife Healthtech Hub in HSITP; (vi) launching the New Industrialisation Acceleration Scheme this year and providing enterprises in the fields of life and health technologies, AI and data science, advanced manufacturing, and new energy technologies with funding up to \$200 million each on a 1 (Government): 2 (Company) matching basis to set up new production facilities in Hong Kong; (vii) earmarking \$3 billion for the implementation of a Frontier Technology Research Infrastructure Support Scheme to accelerate related cross-disciplinary research spearheaded by eight funded universities and renowned scholars; (viii) allocating \$300 million to set up a “digital identity of enterprises” platform (viz. business version of “iAM Smart”); and (ix) allocating \$100 million under the Social Innovation and Entrepreneurship Development Fund to launch territory-wide digital inclusion programmes to enhance the capability of elderlies in adopting digital technologies and to reduce digital exclusion.

Arts and Culture

3.21 With a view to developing Hong Kong into an East-meets-West centre for international cultural exchange, the Government continues to implement a host of measures to support the development of high-quality arts, culture and creative industries. Among them, “Art March” was launched in March 2024 as a brand to promote a series of mega arts and cultural events organised, funded or supported by the Government, such as art exhibitions, film events and a cultural summit. Hong Kong will also host two large-scale arts events in October this year, including the inaugural Hong Kong Performing Arts Expo and the fourth Guangdong-Hong Kong-Macao Greater Bay Area Culture and Arts Festival.

Environment

3.22 The Financial Secretary set out various green initiatives in the Budget covering green finance, green shipping and green aviation, including extending the Green and Sustainable Finance Grant Scheme and allocating \$65 million to provide incentives for Hong Kong-registered ships that have attained a high rating under international standards of decarbonisation formulated by the International Maritime Organization. The first registration tax (FRT) concession arrangement for electric vehicles (EVs) was also extended for two years to 31 March 2026, though with the concessions reduced by 40% for electric private cars (e-PCs) given the price reduction of EVs and increasing availability of vehicle options. At the same time, e-PCs valued at over \$500,000 before tax will not be entitled to concessions under the “affordable users pay” principle. As for other types of electric vehicles, including electric commercial vehicles, electric motorcycles and electric motor tricycles, the FRT will continue to be waived in full over the next two years.

3.23 The relevant legislation for the regulation of disposable plastic tableware and other plastic products came into effect on 22 April 2024. Adopting a progressive implementation model, the Environmental Protection Department (EPD) will not take enforcement actions against non-compliant businesses during the six-month adaptation period. The EPD has arranged for staff to inspect relevant business premises, and will focus on promotion and education, as well as provide appropriate advice to help businesses to comply with the requirements under the new legislation. The EPD also advises businesses to exhaust their stock of the regulated products within the adaptation period to avoid wastage, and source suitable alternatives as early as possible.

Notes :

- (1) Starting from the third quarter of 2019, the index of home purchase affordability is calculated based on, among others, the mortgage rates of new mortgage loans with reference to both the Best Lending Rate (BLR) and the Hong Kong Interbank Offered Rate (HIBOR). As such, the data from the third quarter of 2019 onwards may not be strictly comparable with those in previous quarters, which were based on the mortgage rates of new mortgages loans with reference to the BLR only.

Figures are subject to revision later as more data become available.

- (2) On 28 February, the HKMA made several adjustments to the counter-cyclical macroprudential measures for property mortgage loans and other related supervisory requirements on property loans, while continuing to maintain banking stability and ensuring the proper risk management of property lending by banks. The adjustments, which took immediate effect, included: (i) raising the maximum LTV ratio to 70% for self-occupied residential properties for properties valued at \$30 million or below, 60%-70% with a loan cap of \$21 million for properties valued above \$30 million and up to \$35 million, and 60% for properties valued above \$35 million and all non-self-use residential properties; (ii) increasing the maximum LTV ratio for non-residential properties from 60% to 70%; (iii) increasing the maximum LTV ratio for mortgage loans assessed based on the net worth of mortgage applicants from 50% to 60% (applicable to both residential and non-residential properties); (iv) suspending the interest rate stress testing requirement for property mortgage lending; (v) increasing the overall financing cap for property development projects from 50% of the expected value of the completed properties to 60%; and (vi) lifting the additional capital requirement on banks for exposures to property developers offering mortgage financing with high LTV ratios.
- (3) The figures on transactions refer to commercial space, which comprises retail premises and other premises designed or adapted for commercial use but excludes purpose-built office space.
- (4) Other short-haul markets refer to North Asia, South and Southeast Asia, Taiwan and Macao, but excluding the Mainland, while long-haul markets refer to the Americas, Europe, Africa, the Middle East, Australia, New Zealand and South Pacific. In the first quarter of 2024, visitor arrivals from the Mainland, other short-haul and long-haul markets accounted for respective shares of 77%, 16% and 7% of the total.
- (5) The figures on hotel room occupancy and achieved room rate do not include guesthouses. The figures are subject to revision later as more data become available.

CHAPTER 4 : THE FINANCIAL SECTOR[#]

Summary

- *The high interest rate environment in Hong Kong continued in the first quarter of 2024. As the US Federal Open Market Committee (FOMC) maintained the target range for the Federal Funds Rate at 5.25-5.50%, the Base Rate under the Discount Window operated by the Hong Kong Monetary Authority (HKMA) remained unchanged at 5.75% at end-March. Yet the Hong Kong dollar interbank interest rates came lower during the quarter as seasonal demand for Hong Kong dollar funding faded. Interest rates on the retail front held stable.*
- *The Hong Kong dollar spot exchange rate against the US dollar weakened during the first quarter, due partly to the seasonal decline in corporate funding needs. As the US dollar strengthened against most major currencies, the trade-weighted Hong Kong dollar Nominal and Real Effective Exchange Rate Indices rose by 0.9% and 1.0% respectively during the first quarter.*
- *Total loans and advances decreased by 1.0% during the first quarter. Within the total, loans for use in and outside Hong Kong decreased by 1.2% and 0.5% respectively.*
- *The local stock market remained under pressure in the first quarter. Dampened by heightened geopolitical tensions and tempered expectations for US interest rate cuts, the Hang Seng Index (HSI) headed down on entering 2024. It hit a low of 14 961 on 22 January, but subsequently recouped some of the lost ground as market sentiment improved alongside accelerated growth of the Mainland economy. The HSI closed the quarter at 16 541, down by 3.0% from end-2023. Trading activities regained some momentum towards the end of the quarter. Yet fund raising activities remained quiet.*

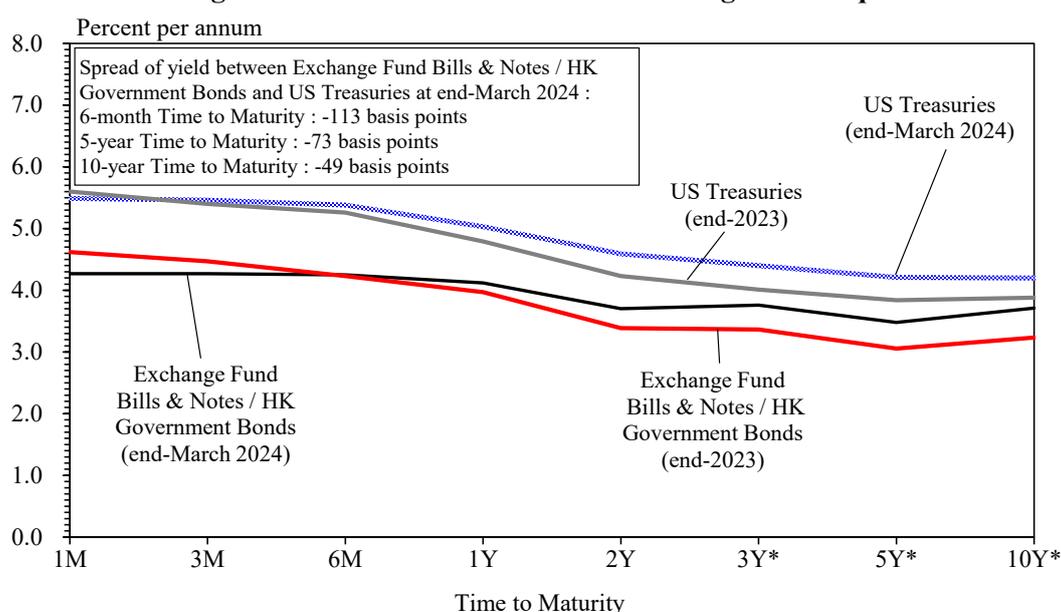

(#) This chapter is jointly prepared by the HKMA and the Office of the Government Economist.

Interest rates and exchange rates

4.1 The high interest rate environment in Hong Kong continued in the first quarter of 2024. As the US FOMC maintained the target range for the Federal Funds Rate at 5.25 – 5.50%, the *Base Rate*⁽¹⁾ under the Discount Window operated by the HKMA was kept unchanged at 5.75% at end-March. Yet the *Hong Kong dollar interbank interest rates* (HIBORs) came lower during the quarter as seasonal demand for Hong Kong dollar funding faded after the year-end. The overnight HIBOR and the 3-month HIBOR receded from 6.09% and 5.15% at end-2023 to 5.00% and 4.72% at end-March 2024 respectively, but still visibly higher than the year-ago levels.

4.2 Both *Hong Kong dollar yields* and *US dollar yields* rose at the medium and long tenors but fell at the shorter end during the first quarter, with the magnitude of changes generally larger for the Hong Kong dollar. Reflecting the relative movements of the Hong Kong dollar yields and the US dollar counterparts, the negative yield spread between 6-month Exchange Fund Bills and 6-month US Treasury Bills widened from 103 basis points at end-2023 to 113 basis point at end-March 2024, while that between 10-year Hong Kong Government Bonds and 10-year US Treasury Notes narrowed from 65 basis points to 49 basis points.

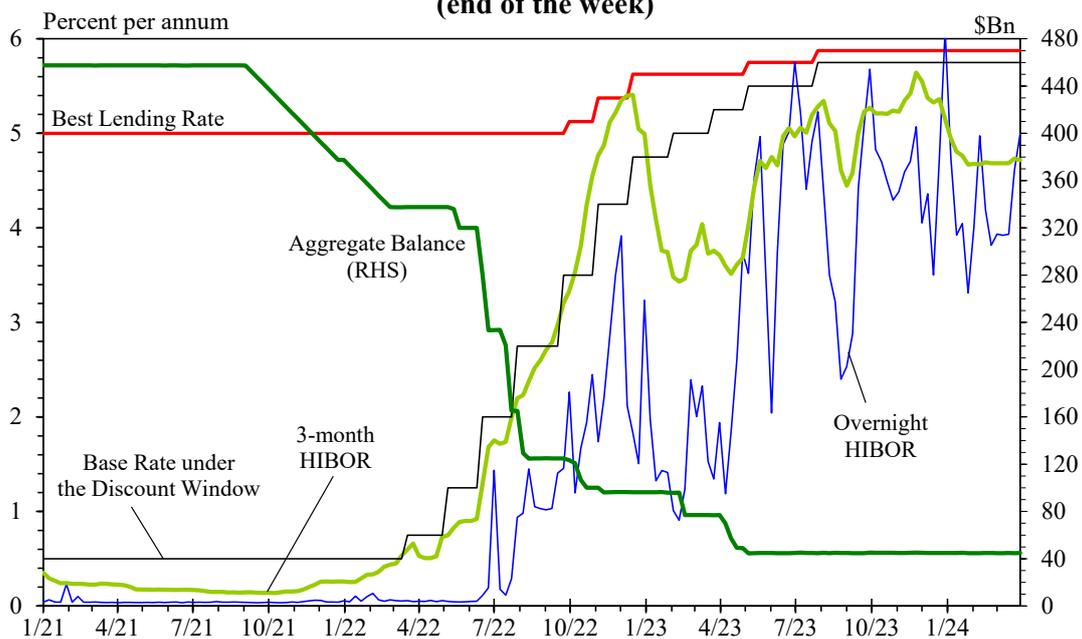

Diagram 4.1 : Both Hong Kong dollar yields and US dollar yields rose at the medium and long tenors but fell at the shorter end during the first quarter

Note : (*) With the HKMA stopping new issuance of Exchange Fund Notes of tenors of 3 years or above since January 2015, the Hong Kong dollar yields for tenor of 3 years and above refer to those for Hong Kong Government Bonds.

4.3 Interest rates on the retail front held stable during the first quarter. The *Best Lending Rates* in the market remained in the range of 5.875% to 6.375%. The *average savings deposit rate* for deposits of less than \$100,000 quoted by major banks and the *one-year time deposit rate* stayed unchanged at 0.79% and 0.67% respectively at end-March 2024. The *composite interest rate*⁽²⁾, which indicates the average cost of funds for retail banks, decreased from 2.94% at end-2023 to 2.73% at end-March 2024.

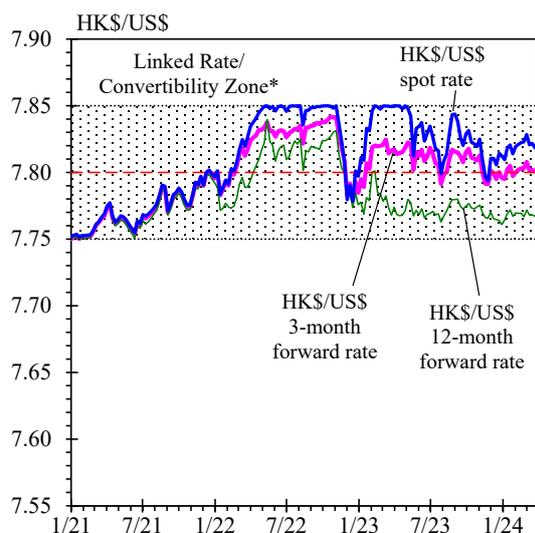

Diagram 4.2 : Interbank interest rates came lower during the first quarter, while interest rates on the retail front held stable (end of the week)

4.4 The *Hong Kong dollar spot exchange rate against the US dollar* weakened during the first quarter, due partly to the seasonal decline in corporate funding needs. It closed the first quarter at 7.824, compared with 7.812 at end-2023. The *Hong Kong dollar forward rates* saw enlarged discounts to the spot rate, with the discounts of 3-month and 12-month forward rates widening from 166 pips and 515 pips (each pip is equivalent to HK\$0.0001) at end-2023 to 197 pips and 570 pips at end-March 2024 respectively. The Aggregate Balance was little changed, at \$44.8 billion at end-March 2024.

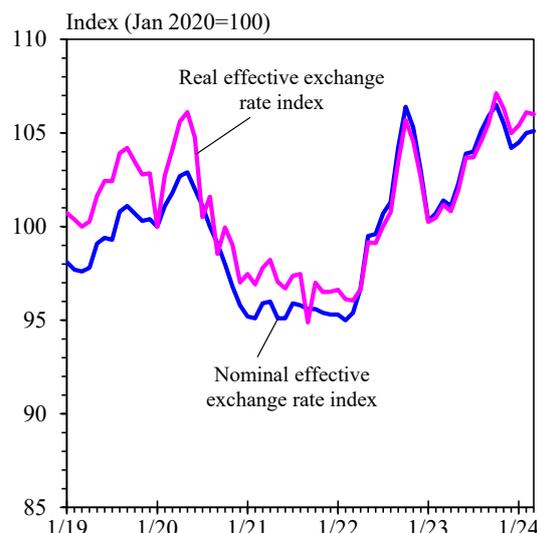

4.5 Under the Linked Exchange Rate System, movements in the Hong Kong dollar exchange rate against other currencies closely followed those of the US dollar. As the US dollar strengthened against most major currencies, the *trade-weighted Hong Kong dollar Nominal and Real Effective Exchange Rate Indices*⁽³⁾ rose by 0.9% and 1.0% respectively during the first quarter.

Diagram 4.3 : The Hong Kong dollar spot exchange rate weakened against the US dollar during the first quarter (end of the week)

Note : (*) The shaded area represents the Convertibility Zone that was introduced in May 2005 as part of the three refinements to the Linked Exchange Rate System.

Diagram 4.4 : The trade-weighted nominal and real effective exchange rate indices rose during the first quarter (average of the month)

Money supply and banking sector

4.6 Compared to end-2023, the Hong Kong dollar broad *money supply* (HK\$M3) was virtually unchanged at \$8,266 billion at end-March 2024, while the seasonally adjusted Hong Kong dollar narrow money supply (HK\$M1) declined by 4.1% to \$1,515 billion⁽⁴⁾. Meanwhile, *total deposits* with authorized institutions (AIs)⁽⁵⁾ decreased by 0.2% to \$16,197 billion, within which Hong Kong dollar deposits increased by 0.1% while foreign currency deposits decreased by 0.4%.

Diagram 4.5 : The Hong Kong dollar broad money supply was virtually unchanged during the first quarter, while narrow money supply declined

% change over a year earlier		-11.4	-5.8	-0.4	3.4	-0.4	3.4

Notes : ([^]) Seasonally adjusted.

([#]) Adjusted to include foreign currency swap deposits.

4.7 *Total loans and advances* decreased by 1.0% over end-2023 to \$10,087 billion at end-March 2024. Within the total, Hong Kong dollar loans and foreign currency loans decreased by 1.1% and 0.9% respectively. Reflecting the relative movements in loans and deposits, the loan-to-deposit ratio for Hong Kong dollar fell from 84.2% at end-2023 to 83.2% at end-March 2024, and that for foreign currency edged down from 43.9% to 43.6%.

4.8 Loans for use in Hong Kong (including trade finance) and loans for use outside Hong Kong decreased by 1.2% and 0.5% respectively over end-2023 to \$7,535 billion and \$2,552 billion at end-March 2024. Within the former, loans to most economic segments declined. Loans to stockbrokers and loans to financial concerns shrank by 10.4% and 7.5% respectively amid the sluggish stock market performance and financing activities. Loans to wholesale and retail trade also fell by 4.7%. On the other hand, the decline in trade finance narrowed to 0.5% while loans to manufacturing resumed modest growth of 0.5%, alongside the improving external trade performance. As for property-related lending, loans to building, construction, property development and investment decreased by 0.7%, while loans for purchase of residential property edged up by 0.1%.

Table 4.2 : Loans and advances

Notes : (a) Figures also include loans for the purchase of flats under the Home Ownership Scheme, Private Sector Participation Scheme and Tenants Purchase Scheme, in addition to those for the purchase of private residential flats.

(b) Loans to individual sectors may not add up to all loans and advances for use in Hong Kong, as some sectors are not included.

(c) Also include loans where the place of use is not known.

4.9 The Hong Kong banking sector remained sound and resilient, underpinned by strong capital and liquidity buffers. Hong Kong incorporated AIs were well capitalised, with the total capital adequacy ratio staying at a high level of 21.1% at end-2023. The local banking sector’s overall asset quality stayed at a healthy level. The ratio of classified loans to total loans for all AIs went down slightly from 1.61% at end-September 2023 to 1.56% at end-2023, though the delinquency ratio for credit card lending edged up from 0.28% to 0.30%. Meanwhile, the delinquency ratio for residential mortgage loans remained at a low level of 0.09% at end-March 2024, slightly higher than that at end-2023.

Table 4.3 : Asset quality of all AIs^{*^}
(as % of total loans)

	Q3	96.49	1.90	1.61
	Q4	96.41	2.03	1.56

Notes : Due to rounding, figures may not add up to 100.

(*) Period-end figures cover Hong Kong offices, overseas branches and major overseas subsidiaries. Loans and advances are classified into the following categories: Pass, Special Mention, Substandard, Doubtful and Loss. Loans in the substandard, doubtful and loss categories are collectively known as “classified loans”.

(^) This table presents the asset quality of all AIs. For retail banks, the pass loans, special mention loans and classified loans (gross) as percentages of total loans were 96.30%, 2.02% and 1.67% respectively at end-2023.

4.10 *Offshore renminbi (RMB) business* remained active in the first quarter. RMB trade settlement transactions handled by banks in Hong Kong surged by 60.6% over a year earlier to RMB3,713.7 billion. Total RMB deposits (including customer deposits and outstanding certificates of deposit) grew by 1.2% over end-2023 to RMB1,058.0 billion at end-March 2024. As to financing activities, RMB bond issuance amounted to RMB93.0 billion in the first quarter (of which RMB12.0 billion was issued by the Ministry of Finance), higher than the RMB90.3 billion in the preceding quarter, while outstanding RMB bank loans increased by 18.8% over end-2023 to RMB524.2 billion at end-March 2024.

The debt market

4.11 As to the Hong Kong dollar *debt market*, total gross issuance of Hong Kong dollar debt securities increased by 5.1% over the preceding quarter to \$1,264.3 billion in the first quarter, with issuance by the public and private sectors⁽⁶⁾ up by 1.6% and 17.6% respectively. The total outstanding amount of Hong Kong dollar debt securities rose by 0.5% over end-2023 to \$2,757.9 billion at end-March 2024, equivalent to 33.4% of HK\$M3 or 27.5% of Hong Kong dollar-denominated assets of the banking sector⁽⁷⁾.

4.12 As to the Hong Kong dollar bonds issued by the Government, a total of \$3.5 billion institutional Government Bonds (GBs) were issued through tenders in the first quarter under the GB Programme. Meanwhile, the second batch of tokenised institutional green bonds was issued under the Government Green Bond (GGB) Programme in February in Hong Kong dollar, RMB, US dollar and euro, with an issuance size totalling around \$6 billion equivalent, marking the first multi-currency digital bond in the world. At end-March, the total outstanding amount of Hong Kong dollar bonds under the GB and GGB Programmes was \$287.2 billion, comprising 16 institutional issues totalling \$100.5 billion, four retail issues (one iBond and three Silver Bonds) totalling

\$144.7 billion under the GB Programme, as well as two retail issues totalling \$40.0 billion and one tokenised institutional issue of \$2.0 billion under the GGB Programme. As for GBs denominated in other currencies, there was one US dollar sukuk with an issuance size of US\$1.0 billion outstanding under the GB Programme, as well as around US\$19.5 billion equivalent of institutional green bonds outstanding under the GGB Programme.

Notes : Figures may not add up to the corresponding totals due to rounding and may be subject to revisions.

(a) AIs : Authorized institutions.

(b) MDBs : Multilateral Development Banks.

The stock and derivatives markets

4.13 The *local stock market* remained under pressure in the first quarter. Dampened by heightened geopolitical tensions and tempered expectations for US interest rate cuts, the HSI slid to 14 961 on 22 January, the lowest since October 2022. It then recouped some of the lost ground as market sentiment improved alongside the accelerated growth of the Mainland economy. The HSI closed the quarter at 16 541, down by 3.0% from end-2023. *Market capitalisation* shrank further by 2.4% to \$30.3 trillion during the quarter. The local stock market ranked the eighth largest in the world and the fifth largest in Asia⁽⁸⁾.

4.14 Trading activities in the local stock market stayed soft in the first quarter but regained some momentum towards the end of the quarter. *Average daily turnover* in the securities market increased by 9.2% over the preceding quarter to \$99.4 billion, though still down 22.3% from the year-ago level. Within the total, the average daily trading value of equities leapt by 13.2% over the preceding quarter, while that of derivative warrants, callable bull/bear contracts, and unit trusts (including Exchange-Traded Funds (ETFs))⁽⁹⁾ fell by 5.3%, 1.1% and 1.3% respectively. As to futures and options⁽¹⁰⁾, the average daily trading volume increased by 11.7%. Within the total, trading of Hang Seng China Enterprises Index futures, HSI futures, HSI options, and stock options increased by 14.1%, 12.8%, 11.8% and 8.7% respectively.

Diagram 4.6 : The local stock market remained under pressure in the first quarter

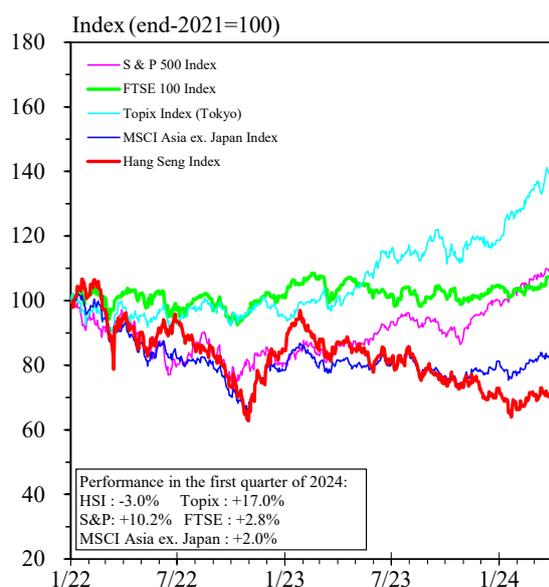

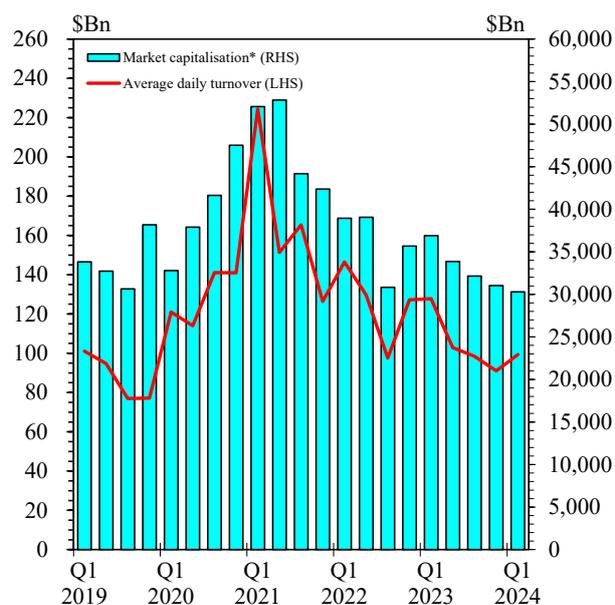

Diagram 4.7 : Market capitalisation shrank further, while trading activities increased somewhat

Note : (*) Position at end of quarter.

Table 4.6 : Average daily turnover of futures and options of the Hong Kong market

		Hang Seng Index futures	Hang Seng Index options	Hang Seng China Enterprises Index futures	Stock options	Total futures and options traded*
2023	Annual	138 446	22 820	186 689	612 182	1 353 839

Note : (*) Turnover figures for individual futures and options are in number of contracts, and do not add up to the total futures and options traded as some products are not included.

4.15 Fund raising activities in Hong Kong remained quiet during the first quarter amid the weak local stock market performance. *Total equity capital raised*, comprising new share floatation and post-listing arrangements on the Main Board and GEM⁽¹¹⁾, shrank by 52.7% from the preceding quarter or by 21.3% from a year earlier to \$26.5 billion in the first quarter. Within the total, the amount of funds raised through Initial Public Offerings (IPOs) decreased by 77.9% from the preceding quarter or by 28.9% from a year earlier to \$4.7 billion. Hong Kong ranked tenth among stock exchange markets globally in terms of the amount of funds raised through IPOs in the first quarter⁽¹²⁾.

4.16 Mainland enterprises continued to play an important role in the Hong Kong stock market. At end-March, a total of 1 450 Mainland enterprises (including 340 H-share companies and 1 110 Non-H share Mainland enterprises) were listed on the Main Board and GEM, accounting for 56% of the total number of listed companies and 77% of total market capitalisation. Mainland-related stocks accounted for 86% of equity turnover and 87% of total equity funds raised in the Hong Kong Stock Exchange in the first quarter.

Fund management and investment funds

4.17 Performance of fund management business generally improved in the first quarter. The aggregate net asset value of the approved constituent funds under the *Mandatory Provident Fund (MPF) schemes*⁽¹³⁾ rose by 3.7% over end-2023 to \$1,183.0 billion at end-March 2024. The monthly average gross retail sales of *mutual funds* increased by 76.4% from the preceding quarter to US\$6.9 billion in January – February⁽¹⁴⁾⁽¹⁵⁾, and were 29.2% higher than the level a year earlier.

Insurance sector

4.18 The *insurance sector*⁽¹⁶⁾ saw solid growth in 2023. For the year as a whole, new office premiums of long-term business leapt by 34.2%, within which premium from non-investment linked plans (which accounted for 94% of total premium for this segment) soared by 41.8%, though that from investment linked plans decreased by 25.1%. As to general business, gross and net premiums rose by 4.1% and 2.7% respectively.

Table 4.7 : Insurance business in Hong Kong[@] (\$Mn)

Highlights of policy and market developments

4.19 To deepen financial cooperation between the Mainland and Hong Kong, the People's Bank of China (PBoC) announced six measures on 24 January, including: (i) expanding the list of eligible collateral to include RMB bonds for the HKMA's RMB Liquidity Facility; (ii) further opening up the onshore repurchase agreement (repo) market to support all foreign institutional investors with access to the China Interbank Bond Market to trade repo; (iii) issuing amendments to enhance the implementation arrangements for the Cross-boundary Wealth Management Connect Pilot Scheme in the Guangdong-Hong Kong-Macao Greater Bay Area (GBA); (iv) introducing facilitative measures on remittances for property purchase by Hong Kong residents in the GBA; (v) deepening the collaboration on cross-boundary credit referencing; and (vi) expanding the cross-boundary pilots of e-CNY. The new measures are conducive to giving full play to Hong Kong's role as an international financial centre and offshore RMB business hub, and actively contributing to the high-quality development of the country's finance.

4.20 As part of the "Fintech 2025" strategy, the HKMA launched a series of initiatives in March to increase Hong Kong's readiness in issuing central bank digital currency (CBDC), including Project Ensemble, an initiative testing the functionality of a wholesale CBDC (wCBDC) and movement of tokenised deposits. This project centres around innovative financial market infrastructure that enables seamless interbank settlement of tokenised money through wCBDC. The HKMA also announced the launch of Phase 2 of the e-HKD Pilot Programme to further explore innovative cases for an e-HKD in Hong Kong. An enhanced e-HKD sandbox, leveraged on the wCBDC sandbox to be built under Project Ensemble, will support the Phase 2 programme to accelerate the development and testing of use cases by pilot participants and facilitate the study of interoperability and interbank settlement between e-HKD and other forms of tokenised money.

4.21 To stay abreast of international trends in green and sustainable finance and accelerate our development as an international green finance centre, the Government issued a vision statement on 25 March on developing the sustainability disclosure ecosystem in Hong Kong. The statement sets out the vision and approach of the Government and financial regulators in developing a comprehensive ecosystem for sustainability disclosure in Hong Kong, including Hong Kong's aspiration to be among the first jurisdictions to align the local sustainability disclosure requirements with the International Financial Reporting Standards - Sustainability Disclosure Standards. Earlier in the month, the Prototype Hong Kong Green Fintech Map was launched, featuring about 50 green fintech firms. The Prototype will help companies and financial institutions better understand the availability and development of green fintech solutions that meet their business needs, thereby raising the profile of firms in the green fintech landscape.

4.22 A number of large-scale financial mega events were held in the first quarter of 2024, namely the Asian Financial Forum in January, the inaugural Hong Kong Green Week in February, and the Financial Mega Event Week (including the second edition of the Wealth for Good in Hong Kong Summit) in March, to showcase Hong Kong's strengths, development potential and investment opportunities as an international centre for green tech and green finance, as well as an international asset and wealth management hub. According to the market study commissioned by Invest Hong Kong, there were over 2 700 single family offices in the city as at end-2023 and around 900 of which were with a wealth level of over USD\$100 million. This reflects Hong Kong's well-developed status as a premier hub for global family offices.

Notes :

- (1) Prior to 9 October 2008, the Base Rate was set at either 150 basis points above the prevailing US Federal Funds Target Rate (FFTR) or the average of the five-day moving averages of the overnight and one-month HIBORs, whichever was higher. Between 9 October 2008 and 31 March 2009, this formula for determination of the Base Rate was temporarily changed by reducing the spread of 150 basis points above the prevailing FFTR to 50 basis points and by removing the other leg relating to the moving averages of the relevant interbank interest rates. After a review of the appropriateness of the new Base Rate formula, the narrower 50 basis point spread over the FFTR was retained while the HIBOR leg was re-instated in the calculation of the Base Rate after 31 March 2009.
- (2) In December 2005, the HKMA published a new data series on composite interest rate, reflecting movements in various deposit rates, interbank and other interest rates to closely track the average cost of funds for banks. The published data enable the banks to keep track of changes in funding cost and thus help improve interest rate risk management in the banking sector. Since June 2019, the composite interest rate has been calculated based on the new local “Interest rate risk in the banking book” framework. As such, the figures are not strictly comparable with those of previous months.
- (3) The trade-weighted Nominal Effective Exchange Rate Index (EERI) is an indicator of the overall exchange value of the Hong Kong dollar against a fixed basket of other currencies. Specifically, it is a weighted average of the exchange rates of the Hong Kong dollar against 18 currencies of its major trading partners, with the weights adopted being the respective shares of these trading partners in the total value of merchandise trade for Hong Kong during 2019 and 2020.

The Real EERI of the Hong Kong dollar is obtained by adjusting the Nominal EERI for relative movements in the seasonally adjusted consumer price indices of the respective trading partners.

- (4) The various definitions of the money supply are as follows:

M1 : Notes and coins with the public, plus customers’ demand deposits with licensed banks.

M2 : M1 plus customers’ savings and time deposits with licensed banks, plus negotiable certificates of deposit (NCDs) issued by licensed banks and held outside the monetary sector, as well as short-term Exchange Fund placements of less than one month.

M3 : M2 plus customers’ deposits with restricted licence banks and deposit-taking companies, plus NCDs issued by such institutions and held outside the monetary sector.

Among the various monetary aggregates, more apparent seasonal patterns are found in HK\$M1, currency held by the public, and demand deposits. As monthly monetary statistics are subject to volatilities due to a wide range of transient factors, such as seasonal and IPO-related funding demand as well as business and investment-related activities, caution is required when interpreting the statistics.

- (5) AIs include licensed banks, restricted licence banks and deposit-taking companies. At end-March 2024, there were 150 licenced banks, 16 restricted licence banks and 11 deposit-taking companies in Hong Kong. Altogether, 177 AIs (excluding representative offices) from 32 countries and territories (including Hong Kong) had a presence in Hong Kong.
- (6) The figures for private sector debt may not represent a full coverage of all the Hong Kong dollar debt paper issued.
- (7) Assets of the banking sector include notes and coins, amount due from AIs in Hong Kong as well as from banks abroad, loans and advances to customers, NCDs held, negotiable debt instruments other than NCDs held, and other assets. Certificates of indebtedness issued by Exchange Fund and the counterpart bank notes issued are nevertheless excluded.
- (8) The ranking is based on the market capitalisation figures of global stock exchange markets compiled by the World Federation of Exchanges and the London Stock Exchange Group.
- (9) Given the relatively small share (less than 0.5% of the daily turnover in the securities market), trading of debt securities and its movements were not analysed.
- (10) At end-March 2024, there were 126 classes of stock options contracts and 98 classes of stock futures contracts.
- (11) At end-March 2024, there were 2 285 and 326 companies listed on the Main Board and GEM respectively.
- (12) The ranking is based on the amount of funds raised through IPOs (including fundraising of special purpose acquisition companies) compiled by Dealogic.
- (13) At end-March 2024, there were 12 approved trustees. On MPF products, 21 master trust schemes, two industry schemes and one employer sponsored scheme, comprising altogether 379 constituent funds, were approved by the Mandatory Provident Fund Schemes Authority. A total of 361 000 employers, 2.64 million employees and 236 000 self-employed persons are estimated to have participated in MPF schemes.
- (14) These figures are obtained from the Sales and Redemptions Survey conducted by the Hong Kong Investment Funds Association (HKIFA) on their members, and cover only the active authorised funds that have responded to the survey. As HKIFA has revised the coverage of its funds statistics for 2023, the figures in this report may not be comparable with those contained in previous issues of this report.
- (15) At end-March 2024, there was one SFC-authorised retail hedge fund with net asset size of US\$116 million. This amount of net assets under management increased by 10.5% from end-2023 and was similar to the level a year earlier, and represented a 27.5% decrease from end-2002, the year when the hedge funds guidelines were first issued.
- (16) At end-March 2024, there were 160 authorized insurers in Hong Kong. Within this total, 53 were engaged in long-term insurance business, 87 in general insurance business, 18 in composite insurance business, and two in special purpose business. These authorized insurers come from 22 countries and territories (including Hong Kong).

CHAPTER 5 : THE LABOUR SECTOR

Summary

- *The labour market remained tight in the first quarter of 2024. The seasonally adjusted unemployment rate stayed low at 3.0%. The underemployment rate was also low at 1.1%. Both the labour force and total employment recorded year-on-year increases.*
- *The unemployment rates of various major sectors stayed low in general in the first quarter.*
- *Establishment survey indicated that wages and labour earnings continued to record decent year-on-year increases in the fourth quarter of 2023. More recent General Household Survey (GHS) data indicated that employment earnings continued to grow solidly in the first quarter of 2024 over a year earlier.*

Overall labour market situation⁽¹⁾

5.1 The labour market remained tight in the first quarter of 2024. The seasonally adjusted *unemployment rate*⁽²⁾ stayed low at 3.0%, slightly higher than the 2.9% in the preceding quarter. The *underemployment rate*⁽³⁾ was also low at 1.1%, though edging up from 1.0%. The unemployment rates of various major sectors stayed low in general in the first quarter. Establishment survey indicated that wages and labour earnings continued to record decent year-on-year increases in the fourth quarter of 2023. More recent General Household Survey (GHS) data indicated that employment earnings continued to grow solidly in the first quarter of 2024 over a year earlier.

Labour force and total employment

5.2 The *labour force*⁽⁴⁾ declined by 0.3% from the preceding quarter to 3 800 100 in the first quarter, but increased by 0.8% over a year earlier. Analysed by contributory factor, the working-age population (i.e. land-based non-institutional population aged 15 and above) increased by 0.2% quarter-to-quarter or 2.3% year-on-year to 6 661 100. Meanwhile, reflecting the persistent drag from population ageing, the overall labour force participation rate continued to decline, by 0.3 percentage point quarter-to-quarter or 0.9 percentage point year-on-year to 57.0% in the first quarter.

5.3 *Total employment*⁽⁵⁾ declined by 0.5% from the preceding quarter to 3 688 400 in the first quarter, but rose by 0.9% over a year earlier. Employment of many sectors decreased compared with the preceding quarter, particularly for the postal and courier activities sector, the wholesale sector, the arts, entertainment and recreation sector, the decoration, repair and maintenance for buildings sector, the financing sector, and the retail sector, but the levels in some of these sectors were still higher than a year ago. Employment of some major sectors increased compared with the preceding quarter, notably for the warehousing and support activities for transportation sector, the information and communications sector, and the social work activities sector, and the levels in most of these sectors were also higher than a year ago.

Profile of unemployment

5.4 The seasonally adjusted unemployment rate edged up from 2.9% in the preceding quarter to 3.0% in the first quarter. The number of unemployed persons (not seasonally adjusted) increased by 5.6% or 5 900 to 111 700.

5.5 The unemployment rates of various major sectors (not seasonally adjusted) stayed low in general in the first quarter. While the unemployment rates of many sectors increased compared with the preceding quarter, they were either below or broadly similar to the pre-recession low levels in the second quarter of 2019. Specifically, the unemployment rate of the construction sector increased by 0.4 percentage point over the preceding quarter to 4.1% in the first quarter (but below the 5.0% in the second quarter of 2019). The unemployment rate of the retail, accommodation and food services sector increased by 0.2 percentage point to 3.8% (but slightly below the 3.9% in the second quarter of 2019). The unemployment rate of the transportation sector increased slightly by 0.1 percentage point to 2.2% (slightly above the 2.0% in the second quarter of 2019). For the *low-paying sectors*⁽⁶⁾ as a whole, the unemployment rate edged up by 0.1 percentage point to 2.4%.

5.6 Analysed by skill segment, the unemployment rates of lower-skilled and higher-skilled workers went up by 0.1 percentage point and 0.2 percentage point over the preceding quarter to 2.9% and 2.2% in the first quarter respectively, which were still low.

5.7 Analysed by other socio-economic attributes, the unemployment rates of many age and educational attainment groups went up in the first quarter compared with the preceding quarter, notably for persons aged 20-24 (up 1.7 percentage points to 10.0%) and those with upper secondary education (up 0.5 percentage point to 3.0%). The unemployment rates of some age and educational attainment groups declined, particularly for persons aged 15-19 (down 1.2 percentage points to 8.1%) and those with lower secondary education (down 0.7 percentage point to 2.9%).

5.8 The situation on unemployment duration was largely stable in the first quarter. The long-term unemployment rate (i.e. the proportion of persons unemployed for six months or longer in the labour force) stayed unchanged at 0.7% in the first quarter, same as the preceding quarter. The number of long-term unemployed persons was at 28 200, about the same as the preceding quarter (28 400). The median duration of unemployment shortened somewhat by 5 days to 77 days.

Underemployment situation

5.9 The underemployment rate increased slightly from 1.0% in the preceding quarter to 1.1% in the first quarter. The number of underemployed persons increased by 8.2% or 3 000 over the preceding quarter to 40 000 in the first quarter.

Profile of employment in establishments

5.10 The quarterly statistics collected from private sector establishments on employment, vacancies, wages and payroll are available up to December 2023. Attempts have been made to bring the analysis more up-to-date by drawing reference to information from supplementary sources wherever possible.

5.11 Total private sector employment increased further by 0.8% over a year earlier to 2 722 800 in December 2023, though it was 0.7% lower than the level three months ago on a seasonally adjusted comparison. Compared with a year ago, employment in many industries increased, notably for the industries of construction sites (covering manual workers only), arts, entertainment, recreation and other services, residential care and social work services, and education. On the other hand, employment in some industries declined, notably for the industries of import/export trade and wholesale.

Notes : Employment figures enumerated from business establishments, as obtained from the Quarterly Survey of Employment and Vacancies, are somewhat different from those enumerated from households, as obtained from the General Household Survey. This is mainly due to the difference in sectoral coverage: while the former survey covers selected major sectors, the latter survey covers all sectors in the economy.

(a) The total figures on private sector employment cover also employment in mining and quarrying; and in electricity and gas supply, and waste management, besides employment in the major sectors indicated above.

(b) These figures cover only those employed on civil service terms of appointment. Judges, judicial officers, ICAC officers, locally engaged staff working in the Hong Kong Economic and Trade Offices outside Hong Kong, and other government employees such as non-civil service contract staff are not included.

() % change over a year earlier.

Quarterly Employment Survey of Construction Sites, Census and Statistics Department.

Vacancies

5.12 Private sector vacancies, at 73 070 in December 2023, was little changed from the level a year ago, though it was 2.7% lower than the level three months ago on a seasonally adjusted comparison. Vacancies in various industries showed diverse movements.

5.13 The manpower balance situation stayed tight in December 2023. The ratio of job vacancies per 100 unemployed persons was 69 in December 2023, slightly lower than 71 three months ago but visibly higher than 57 a year ago. Manpower shortage situation was particularly acute in the human health services sector, the residential care and social work services sector, the accommodation services sector, and the education sector, with their corresponding ratios exceeding 200.

Diagram 5.5 : Manpower balance situation stayed tight in December 2023

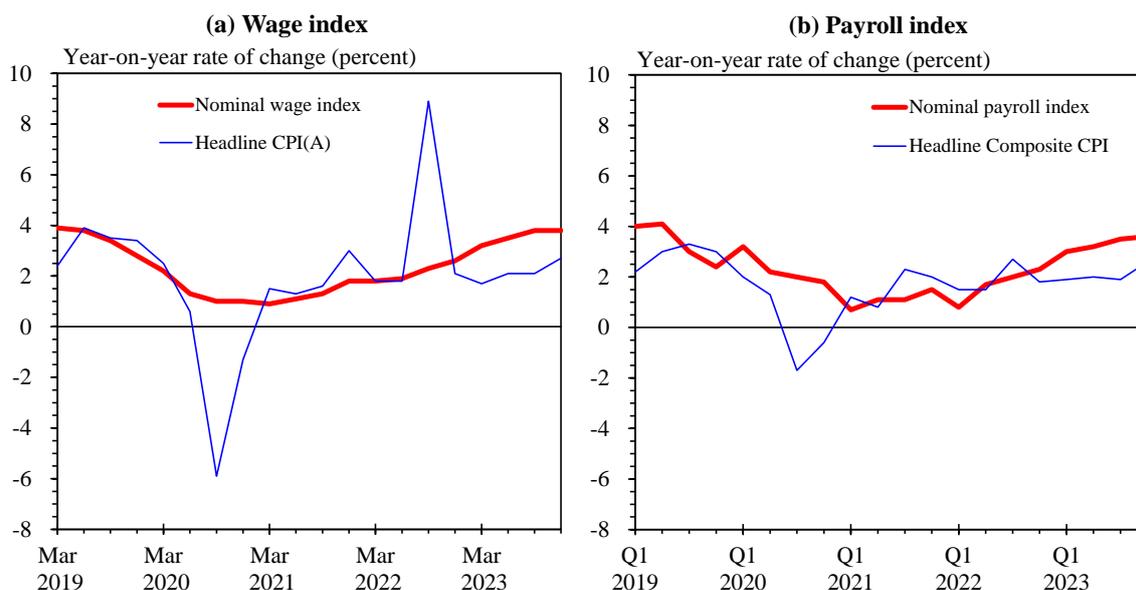

Wages and earnings

5.14 Wages and labour earnings continued to record decent increases in the fourth quarter of 2023 over a year earlier. The average nominal wage rate, as measured by the nominal wage index for all selected industry sections which covers regular payment to employees at the supervisory level or below, rose by 3.8% year-on-year in December 2023, the same as in September 2023. After discounting for *inflation*⁽⁷⁾, the average wage rate increased by 1.1% in real terms.

5.15 Nominal *labour earnings*⁽⁸⁾, as measured by the index of nominal payroll per person engaged for all selected industry sections which covers basic wage, overtime pay, discretionary bonuses and other irregular payments, increased by 3.6% year-on-year in the fourth quarter of 2023, slightly faster than the increase of 3.5% in the preceding quarter. In real terms, labour earnings increased by 1.0%.

5.16 Nominal payroll per person engaged in all selected industries recorded year-on-year increases in the fourth quarter of 2023, particularly for transportation, storage, postal and courier services (up 9.6%), accommodation and food service activities (up 5.5%), and sewerage, waste management and remediation activities (up 4.7%).

Diagram 5.6 : Wages and labour earnings continued to record decent increases in the fourth quarter of 2023 over a year earlier

Note : The year-on-year rates of change of the CPIs from the fourth quarter of 2020 onwards are computed from the new 2019/20-based series, and those before are from the old 2014/15-based series.

5.17 More recent statistics compiled from the GHS, though not strictly comparable to those from the business establishment surveys, indicated that employment earnings continued to grow solidly in the first quarter of 2024 over a year earlier. The median monthly employment earnings of full-time employees (excluding foreign domestic helpers) increased by 5.4% in nominal terms or 3.4% in real terms⁽⁹⁾ in the first quarter. Separately, the median monthly household income (excluding foreign domestic helpers) increased further by 1.8% in nominal terms in the first quarter over a year earlier, though the rate of increase narrowed somewhat against a higher base of comparison. In real terms⁽¹⁰⁾, the median monthly household income declined slightly by 0.2%, having increased visibly in the past year.

Highlights of related measures and policy developments

5.18 On 30 April 2024, the Chief Executive in Council accepted the recommendations of the Minimum Wage Commission on enhancing the review mechanism of the Statutory Minimum Wage (SMW). The recommendations include reviewing the SMW rate once a year (Annual Review), adopting a formula for implementing the Annual Review and reviewing the aforesaid new review mechanism (New Mechanism) five to ten years after its implementation. It is expected that the first SMW rate derived under the New Mechanism will take effect on 1 May 2026.

Notes :

- (1) Labour force statistics enumerated from the General Household Survey are statistics which involve the use of the population figures in the compilation process. The statistics of the three-month periods from November 2021 – January 2022 to October – December 2022 have been revised to take into account the final end-2022 population estimates.

The classification of occupation adopted by the Census and Statistics Department follows the International Standard Classification of Occupations (ISCO), which is used to classify the occupation of an employed person or the previous occupation of an unemployed person. The occupation classification adopted in the General Household Survey has been enhanced since January – March 2022 to follow the International Standard Classification of Occupations 2008 (ISCO-08) more closely. The series has been backcasted to the quarter of January – March 2016. Starting from the reference quarter of January – March 2016, all the labour force statistics by occupation, unless otherwise specified, are compiled based on the revised classification.

- (2) For a person aged 15 or above to be classified as unemployed, he or she should: (a) not have a job and not be performing any work for pay or profit during the reference period (i.e. seven days before enumeration); (b) be available for work during the reference period; and (c) be seeking work during the 30 days before enumeration.

Notwithstanding the above, the following types of persons are also considered unemployed: (a) persons without a job, having sought work but not available for work because of temporary sickness; (b) persons without a job, available for work but not having sought work because they will take up new jobs or start business at a subsequent date, or expect to return to their original jobs; and (c) discouraged workers not having sought work because they believe work is not available to them.

Even at full employment, some frictional unemployment is bound to exist as workers move between jobs in order to obtain better terms of employment. The precise level of unemployment which can be described as purely frictional varies amongst economies, depending on the structure and characteristics of their labour markets.

The seasonally adjusted series is compiled using the X-12 ARIMA method, which is a standard method applied in compiling seasonally adjusted statistical data series.

- (3) The main criteria for an employed person aged 15 or above to be classified as underemployed are: involuntarily working less than 35 hours during the reference period (i.e. seven days before enumeration), and either available for additional work during the reference period or seeking additional work during the 30 days before enumeration.

Following these criteria, employed persons taking no-pay leave due to slack work during the reference period are also classified as underemployed if they had worked less than 35 hours or were on leave for the entire reference period.

- (4) The labour force, or the economically active population, is defined to include all persons aged 15 or above who either were engaged in productive work during the reference period (i.e. seven days before enumeration) or would otherwise have been engaged in productive work but were unemployed.

- (5) Figures enumerated from household data. The employed population is defined here to include those persons aged 15 or above who performed work for pay or profit or had a formal job attachment during the reference period (i.e. seven days before enumeration).
- (6) The low-paying sectors as identified by the Minimum Wage Commission include:
 - (i) retail (including supermarkets and convenience stores, and other retail stores);
 - (ii) food and beverage services (including Chinese restaurants, non-Chinese restaurants, fast food cafes, Hong Kong style tea cafes, and other food and beverage services);
 - (iii) estate management, security and cleaning services (including real estate maintenance management, security services, cleaning services and membership organisations);
 - (iv) other low-paying sectors, including
 - elderly homes;
 - laundry and dry cleaning services;
 - hairdressing and other personal services;
 - local courier services; and
 - food processing and production.
- (7) Different consumer price indices (CPIs) are used for compiling the real indices of labour earnings and wages, taking into account their relevance to the respective occupation coverage. Specifically, the headline Composite CPI, being an indicator of overall consumer prices, is taken as the price deflator for earnings received by employees at all levels of the occupational hierarchy. The headline CPI(A), being an indicator of consumer prices for the relatively low expenditure group, is taken as the price deflator for wages in respect of employees engaged in occupations up to the supervisory level.
- (8) In addition to wages, which include all regular and guaranteed payments like basic pay and stipulated bonuses and allowances, earnings also cover overtime pay and other non-guaranteed or irregular bonuses and allowances, except severance pay and long service payment. Because of this difference, as well as the difference in sectoral and occupational coverage, the movements in average earnings, as measured by payroll per person engaged, do not necessarily match closely with those in wage rates.
- (9) The headline Composite CPI, being an indicator of overall consumer prices, is taken as the price deflator for the median monthly employment earnings of full-time employees (excluding foreign domestic helpers).
- (10) The headline Composite CPI is also taken as the price deflator for the median monthly household income (excluding foreign domestic helpers).

CHAPTER 6 : PRICES

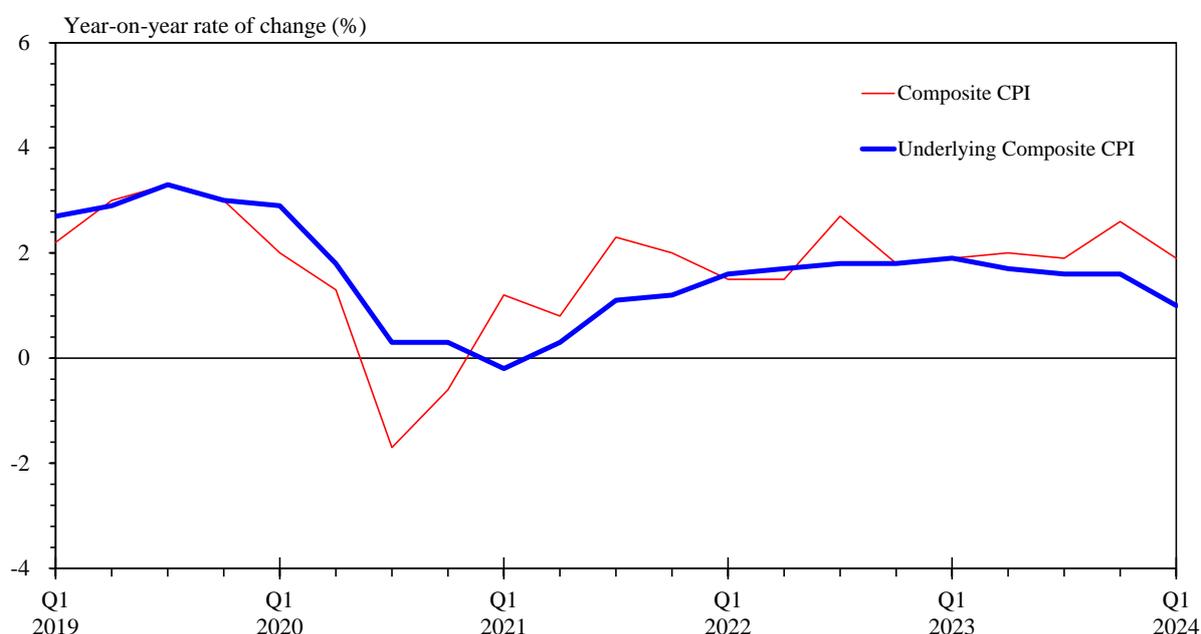

Summary

- *Underlying consumer price inflation was modest in the first quarter of 2024. While prices of meals out and takeaway food continued to rise relatively fast over a year earlier, prices of electricity dropped notably against a high base of comparison. Private housing rentals were largely steady. Price pressures on other major components were broadly in check. The underlying Composite Consumer Price Index (Composite CPI)⁽¹⁾, which nets out the effects of the Government's one-off relief measures, rose by 1.0% year-on-year in the first quarter, after increasing by 1.6% in the preceding quarter.*
- *The headline Composite CPI rose by 1.9% year-on-year in the first quarter, following a 2.6% increase in the preceding quarter. The headline inflation rate was higher than its underlying counterpart in the first quarter as the provision of rates concession by the Government in the same quarter last year resulted in a low base of comparison.*
- *Domestic business cost pressures stayed generally contained. Nominal wages continued to record moderate growth, while commercial rentals remained soft.*
- *External price pressures on consumption-related items moderated.*

Consumer prices

6.1 Underlying consumer price inflation was modest in the first quarter of 2024. While prices of meals out and takeaway food continued to rise relatively fast over a year earlier, prices of electricity dropped notably against a high base of comparison. Private housing rentals were largely steady. Price pressures on other major components were broadly in check. Domestic business cost pressures stayed generally contained. Nominal wages continued to record moderate growth, while commercial rentals remained soft. External price pressures on consumption-related items moderated.

Diagram 6.1: Underlying consumer price inflation was modest in the first quarter of 2024

Note : The year-on-year rates of change of the CPIs from the fourth quarter of 2020 onwards are computed from the new 2019/20-based series, and those before are from the old 2014/15-based series.

6.2 Underlying consumer price inflation, in terms of the year-on-year rate of change in the underlying Composite CPI which nets out the effects of the Government's one-off relief measures, was 1.0% in the first quarter of 2024, compared with 1.6% in the preceding quarter. The headline Composite CPI inflation rate was 1.9% in the first quarter, compared with 2.6% in the preceding quarter. The headline inflation rate was higher than its underlying counterpart in the first quarter as the provision of rates concession by the Government in the same quarter last year resulted in a low base of comparison.

**Table 6.1 : Consumer Price Indices
(year-on-year rate of change (%))**

		<u>Composite CPI</u>		<u>CPI(A)</u>	<u>CPI(B)</u>	<u>CPI(C)</u>
		<u>Underlying^(a)</u>	<u>Headline</u>			
2023	Annual	1.7	2.1	2.3	2.0	2.0
	H1	1.8	2.0	2.1	1.9	2.0
	H2	1.6	2.2	2.5	2.1	2.1

	Q4	0.3	1.3	1.6	1.1	1.0
2024	Q1	*	0.1	-0.1	0.1	-0.1

Notes : (a) Underlying consumer price inflation is calculated by netting out the effects of all Government's one-off relief measures introduced since 2007, including the waiver and Government's payment of public housing rentals, rates concession, suspension and subsequent abolition of Employees Retraining Levy, subsidies for household electricity charges, and waiver of examination fees.

(*) Change within $\pm 0.05\%$.

6.3 Analysed by major component of the underlying Composite CPI, prices of meals out and takeaway food continued to record a relatively fast increase of 3.4% over a year earlier, while prices of basic food declined by 1.0%. Prices of clothing and footwear rose at a moderated rate. Prices of alcoholic drinks and tobacco rose further visibly along with the tobacco duty rate hikes. Price increases of transport and miscellaneous goods remained moderate. Private housing rentals held largely steady with a marginal increase of 0.2%. Meanwhile, prices of electricity, gas and water declined further, as prices of electricity dropped notably from a high base of comparison. Prices of durable goods also continued to fall.

Diagram 6.2 : Food and private housing rental components of the underlying Composite CPI

Note : The year-on-year rates of change of the CPI from the fourth quarter of 2020 onwards are computed from the new 2019/20-based series, and those before are from the old 2014/15-based series.

Diagram 6.3 (a) : Prices of meals out and takeaway food continued to record a relatively fast increase, while prices of electricity, gas and water declined further

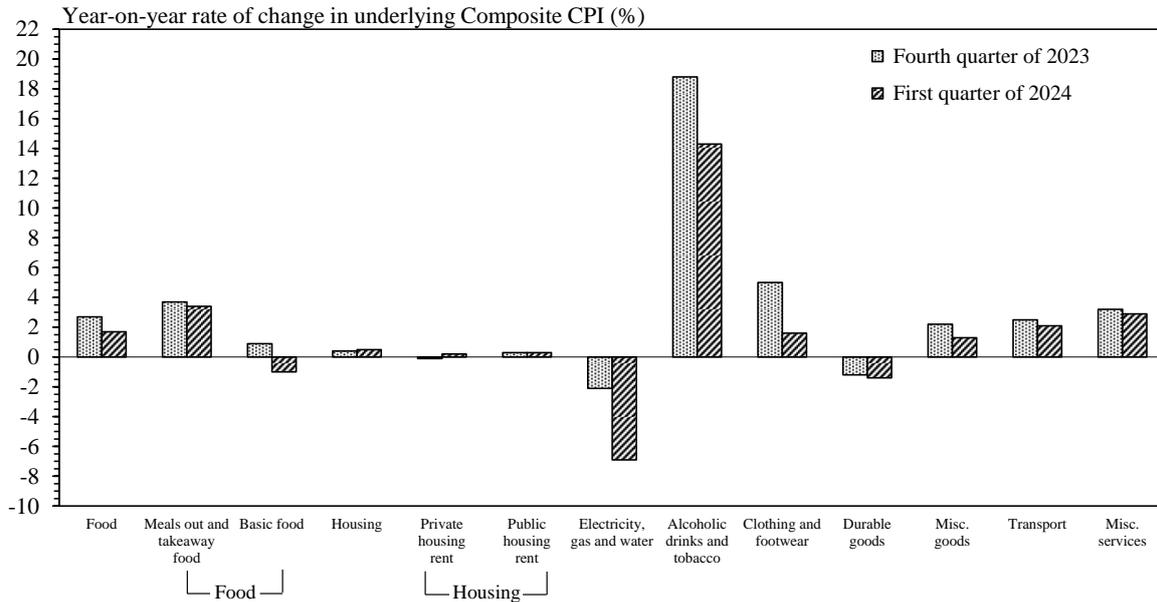

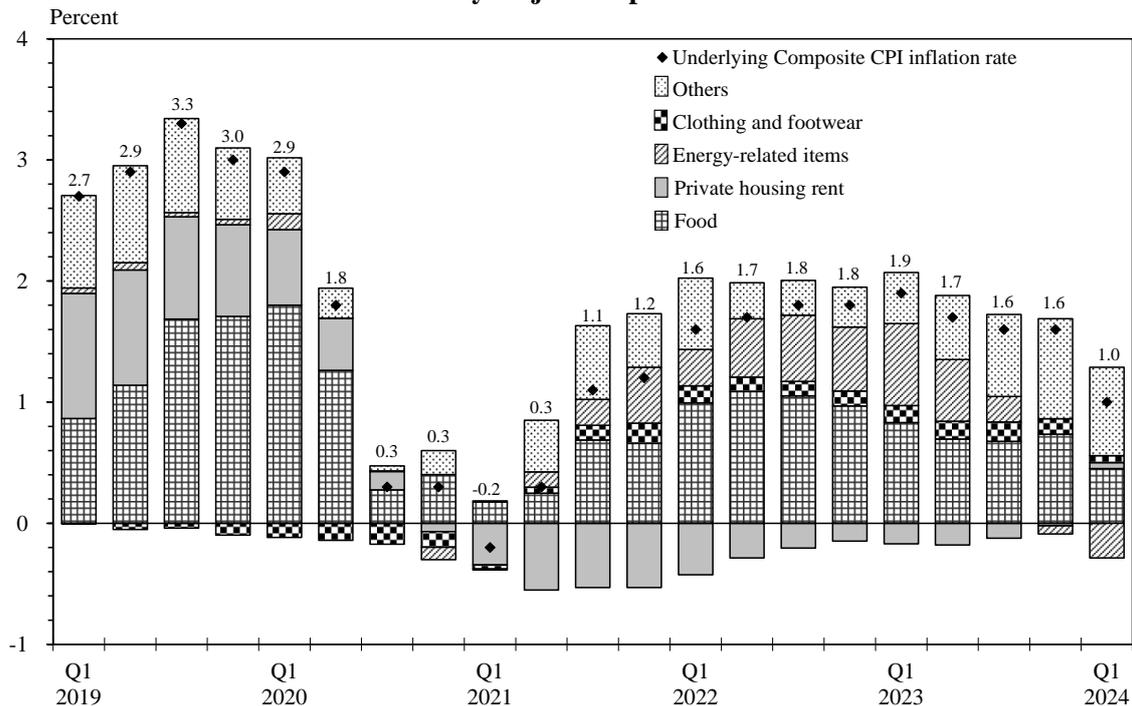

Diagram 6.3 (b) : Contribution to underlying Composite CPI inflation rate by major component

Notes : Energy-related items include electricity, town gas, liquefied petroleum gas and other fuel, and motor fuel.

The year-on-year rates of change of the CPIs from the fourth quarter of 2020 onwards are computed from the new 2019/20-based series, and those before are from the old 2014/15-based series.

Table 6.2 : Underlying Composite CPI by component
(year-on-year rate of change (%))

<u>Expenditure component</u>	<u>Weighting (%)</u>	<u>2022</u>		<u>2023</u>				<u>2024</u>

<i>Public housing rent</i>	1.87	0.3 (9.6)	1.1 (4.4)	1.2 (0.7)	1.5 (1.7)	1.5 (1.7)	0.3 (13.5)	0.3 (13.5)
Electricity, gas and water	2.82	10.4 (7.2)	8.1 (9.6)	17.2 (20.4)	13.2 (15.9)	5.2 (6.1)	-2.1 (-2.3)	-6.9 (-8.0)
Alcoholic drinks and tobacco	0.49	1.3	17.0	11.2	18.8	19.0	18.8	14.3
Clothing and footwear	2.42	5.3	5.8	5.9	5.9	6.5	5.0	1.6
Durable goods	4.00	0.6	-2.4	-2.3	-3.6	-2.5	-1.2	-1.4
Miscellaneous goods	3.32	0.4	1.7	0.9	1.5	2.2	2.2	1.3
Transport	6.17	2.9	1.9	1.4	1.7	2.0	2.5	2.1
Miscellaneous services	13.12	1.3 (1.3)	2.6 (2.6)	2.1 (2.2)	2.5 (2.5)	2.5 (2.5)	3.2 (3.2)	2.9 (2.9)
All items	100.00	1.7 (1.9)	1.7 (2.1)	1.9 (1.9)	1.7 (2.0)	1.6 (1.9)	1.6 (2.6)	1.0 (1.9)

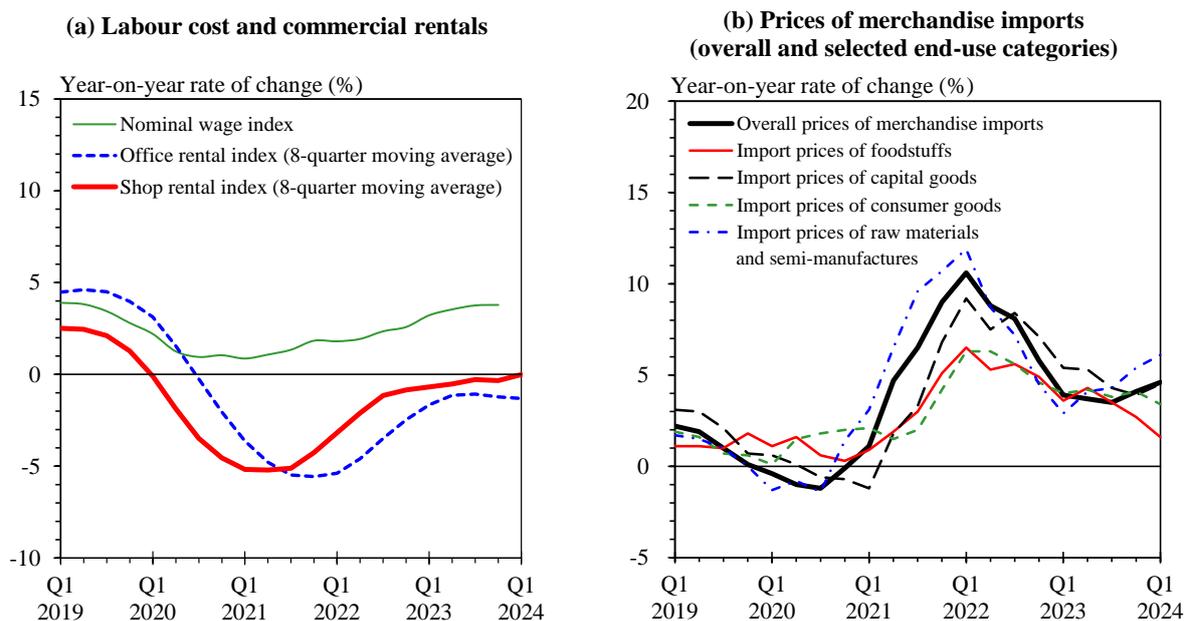

Notes : (a) The housing component covers rents, rates, Government rent, management fees and other housing charges. Its sub-components on private and public housing rents as presented here, however, cover rents, rates and Government rent only. Hence, the combined weighting of private and public housing rents is slightly less than the weighting of the entire housing component.

() Figures in brackets represent the headline rates of change before netting out the effects of Government's one-off relief measures.

Costs of factor inputs and import prices

6.4 Domestic business cost pressures stayed generally contained in the first quarter of 2024. Nominal wages continued to record moderate growth. Commercial rentals faced by businesses remained soft. As a proxy, the eight-quarter moving average of office rentals declined further by 1.3% in the first quarter, while that of shop rentals was virtually unchanged.

**Diagram 6.4 : Domestic business cost pressures stayed generally contained;
external price pressures on consumption-related items moderated**

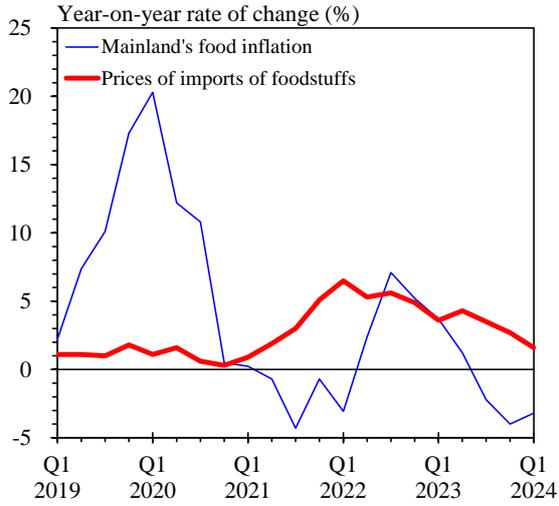

6.5 External price pressures on consumption-related items moderated in the first quarter of 2024. Along with the general downtrend of inflation in many major economies⁽²⁾, the year-on-year increases in import prices of foodstuffs and consumer goods moderated to 1.6% and 3.4% respectively. Import prices of fuels continued to plunge by 12.0% against a high base of comparison. Yet, import prices of capital goods and raw materials and semi-manufactures rose at relatively fast rates of 4.5% and 6.1% respectively.

**Table 6.3 : Prices of imports by end-use category
(year-on-year rate of change (%))**

		<u>Foodstuffs</u>	<u>Consumer goods</u>	<u>Raw materials and semi-manufactures</u>	<u>Fuels</u>	<u>Capital goods</u>	<u>All</u>
2023	Annual	3.6	4.0	4.4	-16.2	4.9	3.9
	H1	4.0	4.1	3.6	-12.4	5.3	3.8
	H2	3.1	3.9	4.9	-19.5	4.1	3.9
	Q1	3.6	4.0	2.9	5.4	5.4	3.9
	Q2	4.3	4.2	4.1	-26.7	5.3	3.7

	Q4	2.7	4.1	5.4	-16.7	3.9	4.1
2024	Q1	1.6	3.4	6.1	-12.0	4.5	4.6

Diagram 6.5: Prices of merchandise imports by selected end-use category

(a) Increase in import prices of foodstuffs slowed

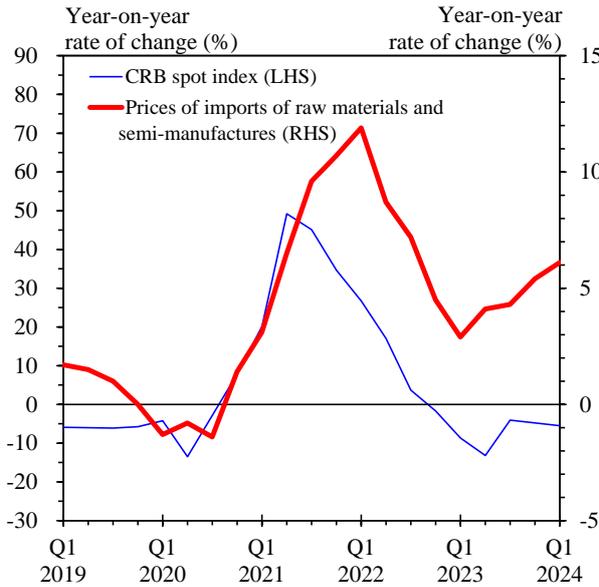

(b) Import prices of consumer goods saw moderated increase

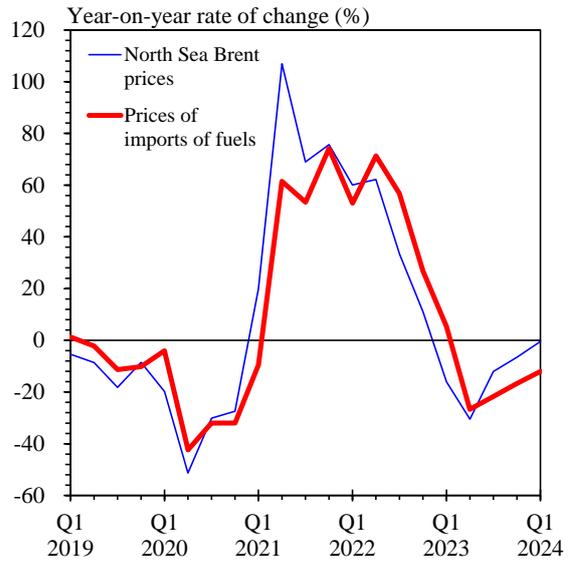

Note : An increase in the nominal EERI indicates strengthening of the Hong Kong dollar. The y-axis of nominal EERI in this graph is inverted for easier comprehension.

(c) Import prices of raw materials and semi-manufactures increased relatively fast

(d) Import prices of fuels continued to plunge

Output prices

6.6 Output prices, as measured by the *Producer Price Indices*⁽³⁾, saw mixed movements across different sectors in 2023. Output prices for the manufacturing sector continued to register a mild increase. Among the selected service sectors, output prices for accommodation services surged and those for courier services turned to increases, while those for land transport were virtually unchanged. On the other hand, output prices for water transport and air transport recorded visible falls from their high levels caused by pandemic-induced disruptions in 2022. Output prices for telecommunications services continued the secular downtrend.

Table 6.4 : Producer Price Indices for the manufacturing sector and selected service sectors (year-on-year rate of change (%))

<u>Industry group</u>	<u>2022</u>					<u>2023</u>				
	<u>Annual</u>	<u>Q1</u>	<u>Q2</u>	<u>Q3</u>	<u>Q4</u>	<u>Annual</u>	<u>Q1</u>	<u>Q2</u>	<u>Q3</u>	<u>Q4</u>

Note : (*) Change within $\pm 0.05\%$.

GDP deflator

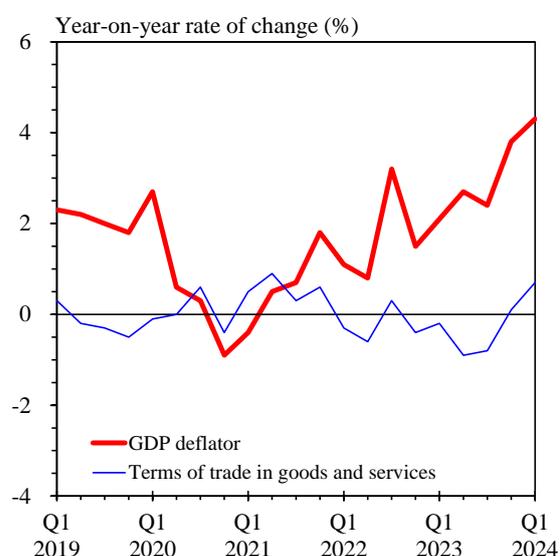

6.7 As a broad measure of the overall change in prices in the economy, the *GDP deflator*⁽⁴⁾ rose further by 4.3% year-on-year in the first quarter of 2024, after increasing by 3.8% in the preceding quarter. The *terms of trade*⁽⁵⁾ increased further by 0.7%. Taking out the external trade components, the domestic demand deflator increased by 3.0% over a year earlier in the first quarter, after rising by 3.7% in the preceding quarter.

Terms of trade in goods and services ^{&}	-0.3	-0.4	-0.2	-0.9	-0.8	0.1	0.7

Notes : Figures are derived based on the series of chain volume measures of GDP. They are subject to revision later on as more data become available.

(&) Figures are compiled based on the change of ownership principle in recording goods sent abroad for processing and merchanting under the standards stipulated in the *System of National Accounts 2008*.

(#) Revised figures.

<> Seasonally adjusted quarter-to-quarter rate of change.

Notes :

- (1) The Consumer Price Indices (A), (B) and (C) are compiled with reference to the average expenditure patterns for different groups of households as obtained from the Household Expenditure Survey. Then, by aggregating the expenditure patterns of all the households covered by the above three indices, a Composite CPI is compiled.

In May 2021, the Census and Statistics Department updated the base period and expenditure weights for compiling the CPIs. CPI figures quoted in this report refer to the 2019/20-based series unless otherwise stated.

The expenditure ranges of the households covered in the 2019/20-based CPIs are shown below:

	Approximate proportion of <u>households covered</u> (%)	Average monthly expenditure range <u>during Oct 2019 to Sep 2020</u> (\$)
CPI(A)	50	6,500 to 27,999
CPI(B)	30	28,000 to 48,499
CPI(C)	10	48,500 to 91,999

The weightings of the various components in the 2019/20-based CPIs are as follows:

<u>Expenditure component</u>	<u>Composite CPI</u> (%)	<u>CPI(A)</u> (%)	<u>CPI(B)</u> (%)	<u>CPI(C)</u> (%)
Food	27.41	32.71	26.76	21.89
<i>Meals out and takeaway food</i>	17.05	18.87	17.27	14.55
<i>Basic food</i>	10.36	13.84	9.49	7.34
Housing	40.25	40.46	40.77	39.24
<i>Private housing rent</i>	35.46	33.43	37.22	35.44
<i>Public housing rent</i>	1.87	4.95	0.55	--
<i>Management fees and other housing charges</i>	2.92	2.08	3.00	3.80
Electricity, gas and water	2.82	3.85	2.57	1.92
Alcoholic drinks and tobacco	0.49	0.76	0.41	0.27
Clothing and footwear	2.42	1.78	2.51	3.08
Durable goods	4.00	3.29	3.94	4.97
Miscellaneous goods	3.32	3.31	3.48	3.10
Transport	6.17	4.52	6.38	7.89
Miscellaneous services	13.12	9.32	13.18	17.64
All items	100.00	100.00	100.00	100.00

- (2) The table below presents the year-on-year rates (%) of consumer price inflation in selected economies.

- (3) The Producer Price Indices are designed to reflect changes in the prices of goods and services received by local producers. Producer prices refer to the transacted prices, net of any discounts or rebates allowed to the buyers.
- (4) The implicit price deflators of GDP and its main expenditure components are derived by dividing GDP at current prices by the corresponding chained-dollar figures. The rate of change in the GDP deflator may differ substantially from that in the Composite CPI over the same time span. The Composite CPI covers consumer price inflation in particular. Yet the GDP deflator is a much broader measure of inflation for the entire economy, and takes into account all the price changes related to consumption, investment, exports and imports. Also, the rate of change in the GDP deflator may differ appreciably from that in the total final demand deflator, depending on the movement in the prices of final demand and imports. Likewise, the rate of change in the GDP deflator may differ appreciably from that in the domestic demand deflator, depending on the movement in the prices of imports and exports.
- (5) The terms of trade is defined as the ratio of the prices of total exports to the prices of total imports.

Statistical Appendix

<u>Table</u>	<u>Page</u>
1. Gross Domestic Product by expenditure component (at current market prices)	98-99
2. Rates of change in chain volume measures of Gross Domestic Product by expenditure component (in real terms)	100-101

Definition of Terms :

Total final demand	= private consumption expenditure + government consumption expenditure + gross domestic fixed capital formation + changes in inventories + total exports of goods + exports of services
Private sector domestic demand	= private consumption expenditure + gross domestic fixed capital formation by the private sector + changes in inventories
Public sector domestic demand	= government consumption expenditure + gross domestic fixed capital formation by the public sector
Domestic demand	= private sector domestic demand + public sector domestic demand
External demand	= total exports of goods + exports of services

Notes: Individual figures may not add up exactly to the total due to rounding.

- (a) In accordance with the accounting rules adopted in compiling Balance of Payments, a positive value for the balance figure in the current account and capital account represents a surplus whereas a negative value represents a deficit.
- (b) A new sign convention has been adopted for the entire series of the financial account since June 2023. A positive value indicates an increase in net assets (a net financial outflow) while a negative value indicates a decrease in net assets (a net inflow). A positive value for the reserve assets represents an increase while a negative value represents a decrease.
- (#) Figures are subject to revision later on as more data become available.

Notes: Individual figures may not add up exactly to the total due to rounding.

- (a) Figures before 2002 cover all completed residential premises to which either temporary or full Occupation Permits have been granted, as well as village type houses issued with Letters of Compliance. Property developments subject to a Consent Scheme need a Certificate of Compliance, Consent to Assign or Consent to Lease in addition to an Occupation Permit before the premises can be individually assigned. Village-type housing units are excluded as from 2002 and units issued with temporary Occupation Permits are also excluded as from 2004 onwards.
- Residential premises here pertain to private residential units, excluding units built under the Private Sector Participation Scheme (PSPS), Home Ownership Scheme (HOS), Buy or Rent Option, Mortgage Subsidy Scheme, Sandwich Class Housing Scheme, Urban Improvement Scheme (UIS) and Flat-for-Sale Scheme. Figures from 2004 onwards also cover those private flats converted from subsidised flats.
- (b) These include retail premises and other premises designed or adapted for commercial use, with the exception of purpose-built offices. Car-parking space and commercial premises built by the Hong Kong Housing Authority and the Hong Kong Housing Society are excluded.
- (c) These include industrial-cum-office premises, but exclude specialised factory buildings which are developed mainly for own use.
- (d) These include storage premises at the container terminals and the airport.

Flatted factory space	3 637	2 006	1 861	551	420	369	356

Notes: (e) The series, sourced from the Housing Authority's housing production figures, exhaustively cover all housing production and to count projects (including surplus HOS projects) which undergo transfer of usage at the time of disposal and according to their actual usage. Moreover, surplus HOS courts and blocks pending disposal are excluded from production statistics until they are disposed. Rental and sales flats projects of the Housing Society are included.

(f) These include multi-purpose industrial premises designed also for office use.

(g) The figures are derived from sale and purchase agreements of domestic units received for registration for the relevant periods. They generally relate to transactions executed up to four weeks prior to their submission for registration. Sales of domestic units refer to sale and purchase agreements with payment of stamp duty. These statistics do not include sales of units under the Home Ownership Scheme, the Private Sector Participation Scheme and the Tenants Purchase Scheme except those after payment of premium. Primary sales generally refer to sales from developers. Secondary sales refer to sales from parties other than developers.

(h) Timing of the figures for non-residential properties is based on the date on which the sale and purchase agreement is signed, which may differ from the date on which the agreement is received for registration.

N.A. Not yet available.

Definition of Terms :

The Hong Kong Dollar Money Supply is the Hong Kong dollar component of the respective monetary aggregate.

Total Money Supply:

- M1: Legal tender notes and coins with the public, plus customers' demand deposits with licensed banks.
- M2: M1 plus customers' savings and time deposits with licensed banks, plus negotiable certificates of deposit issued by licensed banks and held outside the monetary sector, as well as short-term Exchange Fund placements of less than one month.
- M3: M2 plus customers' deposits with restricted licence banks and deposit-taking companies, plus negotiable certificates of deposit issued by such institutions and held outside the monetary sector.

Notes: Upon the implementation of the new Hong Kong Standard Industrial Classification (HSIC) Version 2.0 by the C&SD in October 2008, the new classification has been adopted in compiling the quarterly business receipts indices. Starting from the first quarter of 2009, all business receipts indices are compiled based on the HSIC Version 2.0, and the base period of the indices has been changed to 2008 (i.e. with the quarterly average of the indices in 2008 taken as 100). The series of business receipts indices under the HSIC Version 2.0 has also been backcasted to the first quarter of 2005.

(a) Accommodation services sector covers hotels, guesthouses, boarding houses and other establishments providing short-term accommodation.

Notes: Starting from March 2009, the survey coverage has been expanded to include more economic activities in some of the industries due to the change in industrial classification based on the Hong Kong Standard Industrial Classification (HSIC) Version 2.0. The activities newly covered are in the industries of transportation, storage, postal and courier services; professional and business services; and arts, entertainment, recreation and other services. The series of employment statistics under the HSIC Version 2.0 has also been backcasted to March 2000.

(a) Accommodation services sector covers hotels, guesthouses, boarding houses and other establishments providing short-term accommodation.

(b) These figures cover only those employed on civil service terms of appointment. Judges, judicial officers, ICAC officers, locally engaged staff working in the Hong Kong Economic and Trade Offices outside Hong Kong, and other government employees such as non-civil service contract staff are not included.

(c) Include employment in mining and quarrying; and in electricity and gas supply, and waste management.

Notes: The rates of change in real terms are compiled from the Real Indices of Payroll per Person Engaged. The Indices are derived by deflating the Nominal Indices of Payroll per Person Engaged by the 2019/20-based Composite CPI.

In addition to wages, which include all regular and guaranteed payments like basic pay and stipulated bonuses and allowances, payroll also covers overtime pay and other non-guaranteed or irregular bonuses and allowances, except severance pay and long service payment. Because of this difference, as well as the difference in industrial and occupational coverage, the movements in payroll per person engaged do not necessarily match closely with those in wage rates.

(a) Accommodation services sector covers hotels, guesthouses, boarding houses and other establishments providing short-term accommodation.

(*) Change within $\pm 0.05\%$.
