# 2010年經濟權況及2011年展望 2010 Economic Background and 2011 Prospects

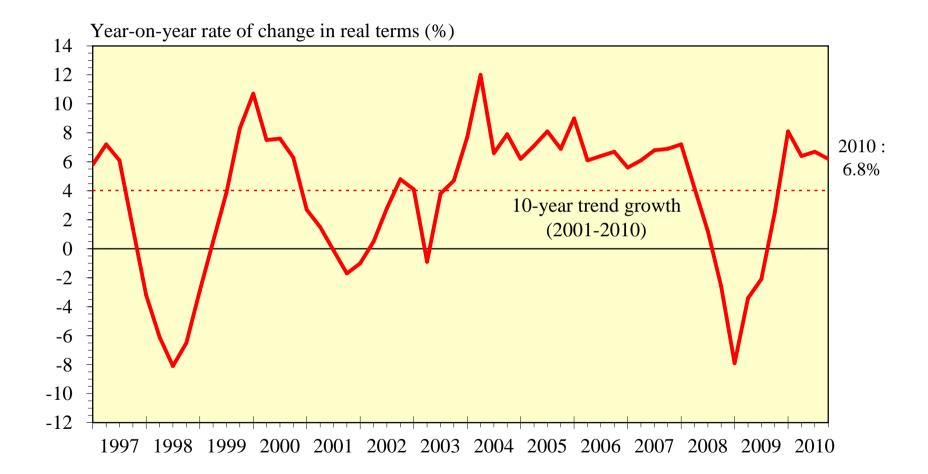

# 二零一一年二月二十三日 23 February 2011

**2010 Performance** 

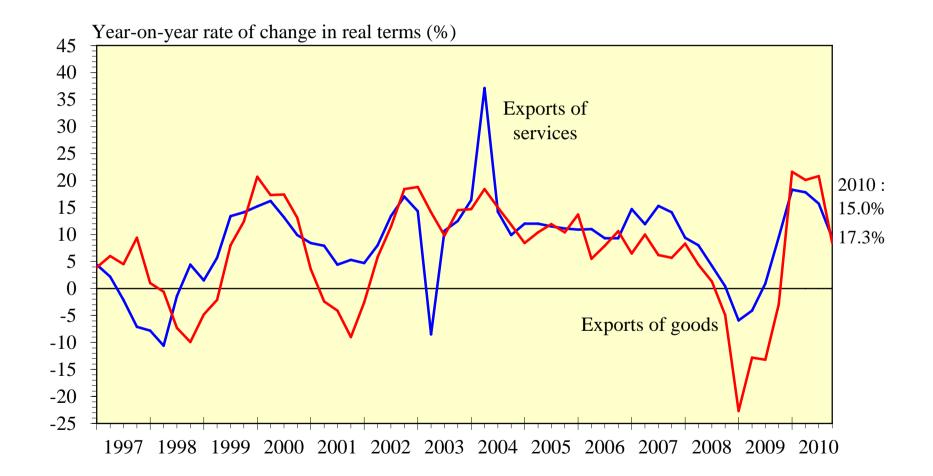

# Salient features of economic performance in 2010

- Economy maintained notable growth pace at 6.2% in Q4, making 6.8% growth for 2010 as a whole
- Full-fledged recovery
- Substantial job growth; unemployment down to 3.8% lately
- Inflation went up, due to higher imported inflation and return of local cost pressures

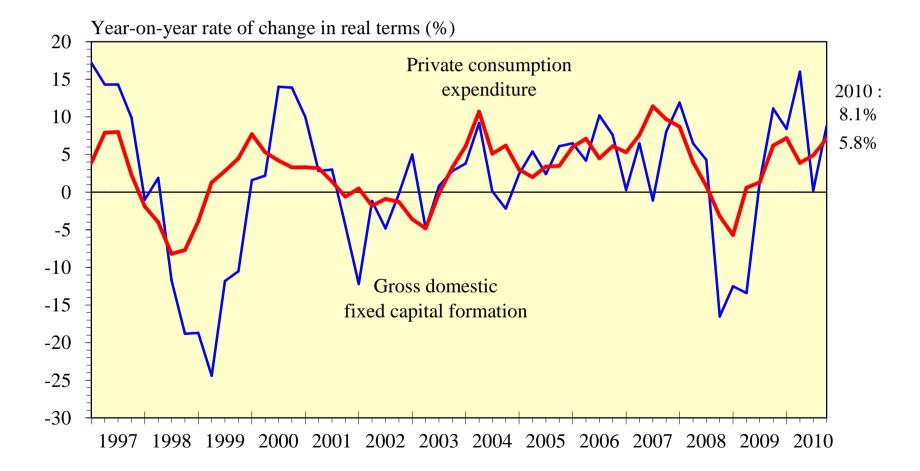

#### **Broad-based economic expansion in 2010**

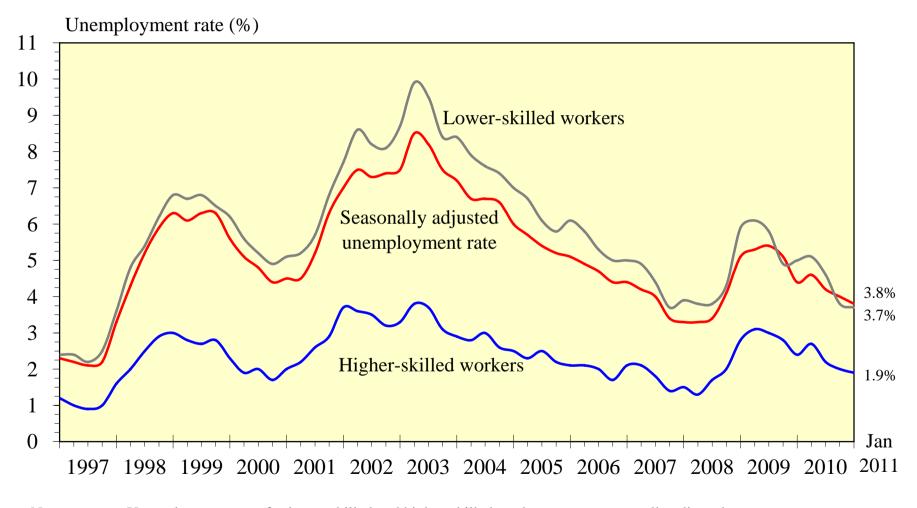

#### **Exports of both goods and services rebounded sharply**

#### **Domestic sector was another key growth driver**

#### **Broad-based improvements in labour market**

Note: Unemployment rates for lower-skilled and higher-skilled workers are not seasonally adjusted.

### Labour incomes rose further

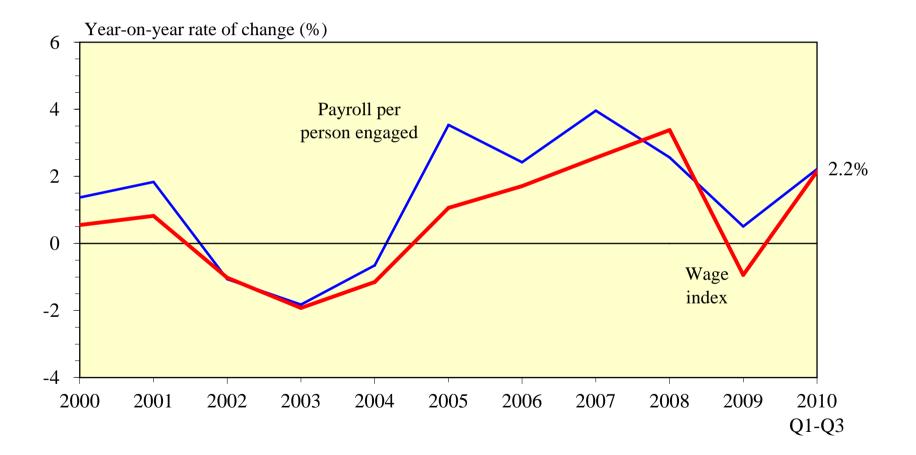

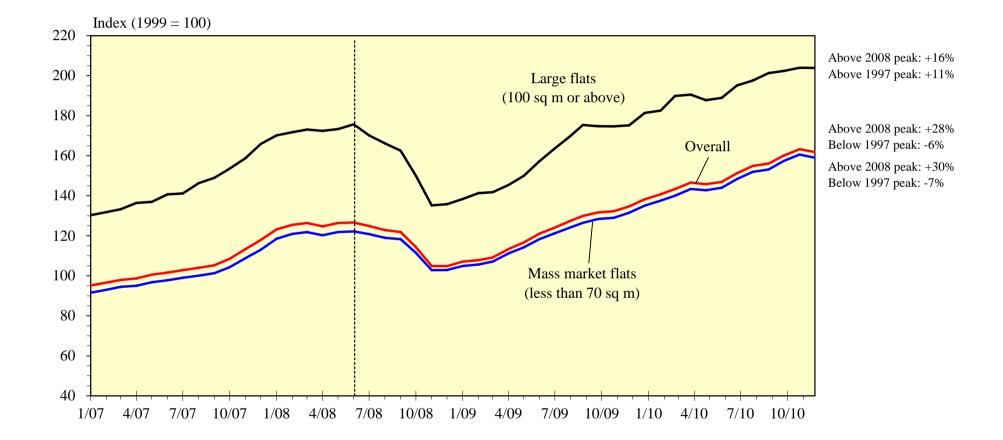

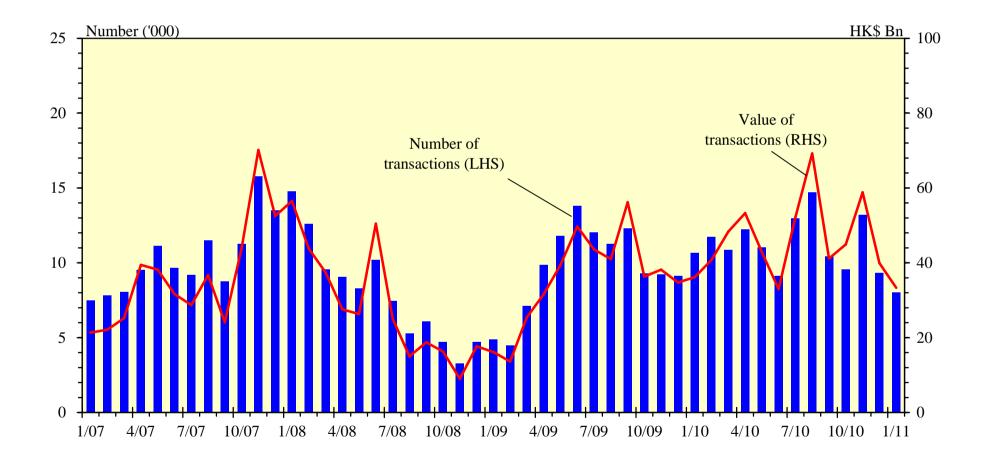

Chart 9

# **Property Market**

# Flat prices rose by another 20% in 2010, under the boost of abundant liquidity and tight supply

## Transactions sharply lower in December 2010 and January 2011 following SSD

### Short-term resale largely subsided, down 34% in January 2011 over November 2010

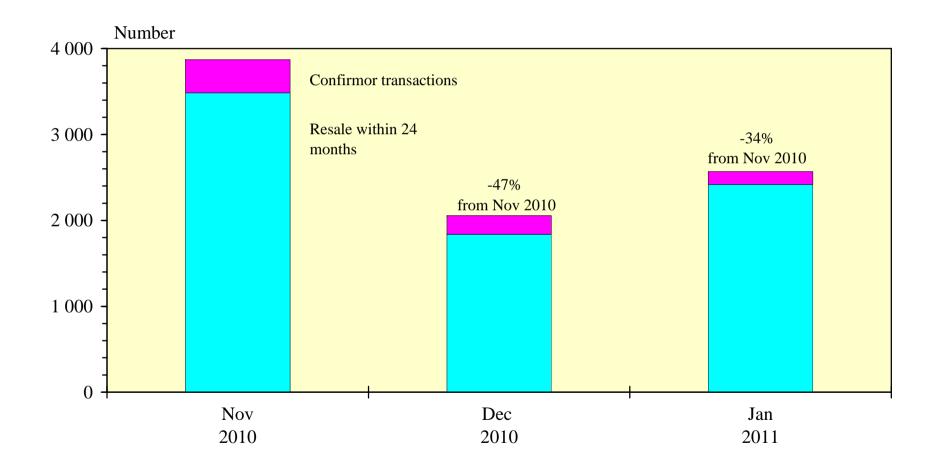

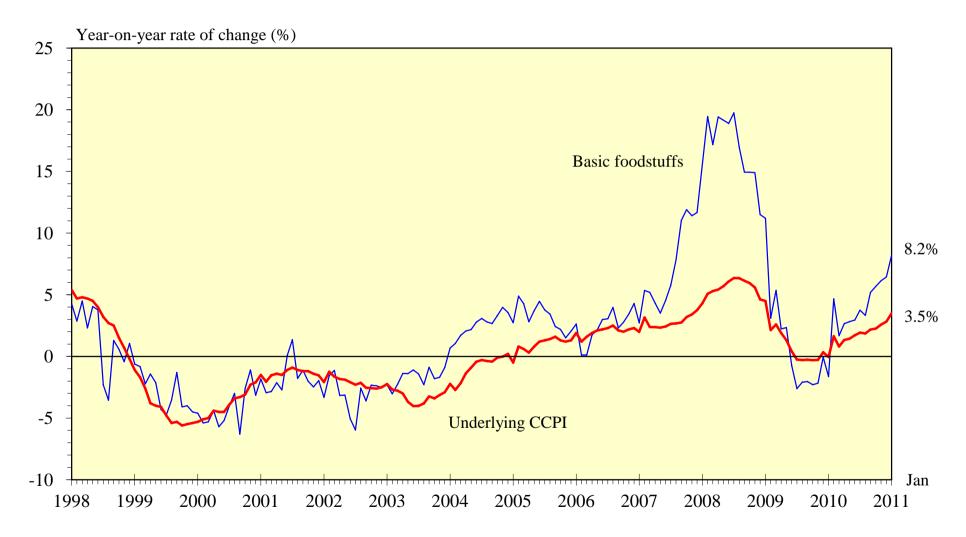

Chart 13

# Inflation

#### Inflation climbed up further, driven by higher imported inflation and rise-back in domestic pressures

### **Rising inflation is a common phenomenon in Asia**

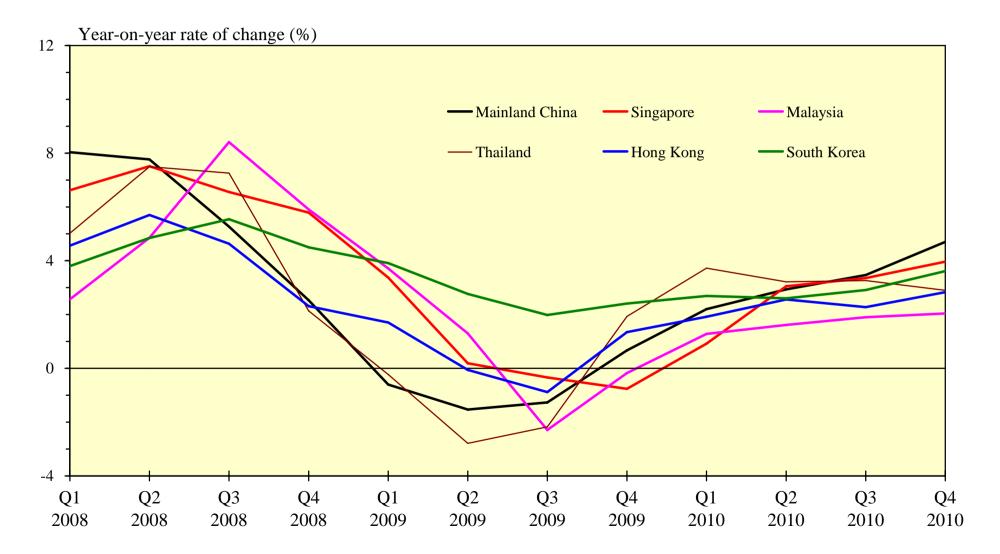

Chart 16

# **2011 Economic Outlook**

#### **Economy poised for solid growth in 2011**

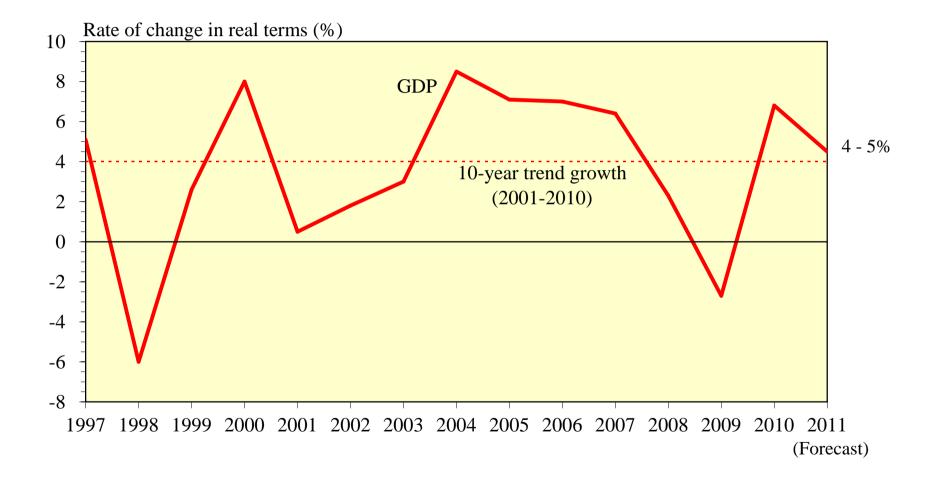

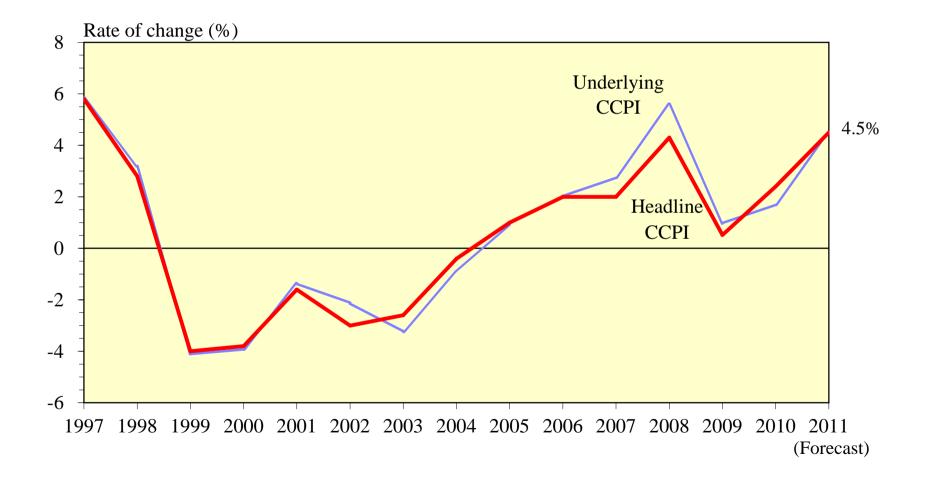

Chart 17

# **2011 Economic outlook**

- Outlook for 2011 is for economy to return to more normal growth path
- Another year of good growth in merchandise exports, though not as rapid as in 2010
- Domestic demand and inbound tourism likely to take up a more prominent role in driving overall economic growth
- GDP growth forecast for 2011 : 4% to 5%
- Underlying inflation will go higher to 4.5%

#### Inflation will go higher to 4.5% in 2011

# **Major sources of risks**

#### **External:**

- Sovereign debt problem in the eurozone
- Fragile fundamentals in many advanced economies
- Rising protectionist sentiments in developed economies
  Local:
- Housing market exuberance
- **Rising inflation**

## **Housing market**

Several rounds of measures since the 2010 Budget to contain housing market bubble risks, along 4 directions:

- Increase land supply
- Curtail speculation
- Tighten mortgage terms to forestall excessive credit growth
- Increase market transparency

### **Inflation risks**

- Relief measures to alleviate the impact of inflation on the lower-income group
- Ensure stable and sufficient food supply
- Targeted measures to forestall housing market bubble
- Macro-prudential measures by HKMA
- Contain public expenditure over the medium term
- Inflation-linked bonds

### Medium term prospects are bright

- Transformation towards high value-added and knowledgebased economy
- Strengthening economic integration with the Mainland
- The National 12<sup>th</sup> Five-Year Plan: New opportunities
- Uphold Hong Kong's status as international financial centre and regional business hub
- Six economic areas to complement the four traditional pillar industries
- Large-scale infrastructure projects

# Thank you
